Transportation security technology finds applications in various industry segments, to confirm safety of goods, products, or people in travel. This technology is majorly used in airport security, courier companies, railway departments, mass transit, logistics, port security, and returnable transport items. The demand for transportation security equipment has been increasingly significantly, owing to the advanced security while in transit.

At present, the North America region dominates the global transportation security technology market. The region has major players offering advanced solutions. This is attributed to the extensive adoption of advanced technology by the region for the security of public and infrastructure, [which is expected to propel the market growth](#). An example of such adoption is the Canadian Air Transport Security Authority (CASTA), which is an agent crown corporation funded by the government. In 2017, CASTA screened over 68.1 million passengers and their belongings at airport checkpoints across the country.

In the transportation mode segment, the airway sub-segment dominated the market in 2017,

owing to the highest availability of airports throughout the world.
