Rise in demand for better business processes and streamlining of operations. Higher-valued IT service provision is being resourced by increase in use of the subscription-based pricing model to stimulate market growth. On the contrary, growing data security concerns are likely to restrain market expansion, however, rise in IoT as a service and AI as a service adoption are anticipated to boost this market in unforeseen future.

XaaS refers to programs and services accessed through internet-connected systems. As even tiny businesses can use cloud-based architecture for almost all of their technological needs, the service revolution has completely changed the globe. This has altered how businesses operate, expand, and scale. The "as-a-service" component of cloud computing has become increasingly widespread globally. Several approaches, including software as a service (SaaS), infrastructure as

a service (IaaS), and platform as a service (PaaS) have therefore gained popularity.

The SaaS segment was the highest revenue contributor to the market, with \$154.3 billion in 2021, and is estimated to reach \$1,073.0 billion by 2031, with a CAGR of 21.6%. The IaaS segment is estimated to reach \$505.3 billion by 2031, at a significant CAGR of 16.1% during the forecast period.

The BFSI segment was the highest revenue contributor to the market, with \$83.0 billion in 2021, and is estimated to reach \$340.0 billion by 2031, with a CAGR of 15.3%.
