In the coming years, the [nepexto market size](#) is predicted to see a future compound annual growth rate FCAGR of XX%, reaching \$XX million by 2029. Key factors propelling this growth include rising demand for cost-effective biologics alternatives, expansion of biosimilar markets in developing regions, supportive regulatory frameworks for biosimilar adoption, increasing global healthcare expenditure, and growing preference for homecare and self-administered biologics.

How can the Rising Prevalence of Chronic Diseases Drive the Nepexto Market?

The upward trend of chronic diseases is spurring the [growth of the nepexto market](#). Chronic diseases, persistent conditions lasting over three months, require continuous medical attention and often limit daily activities. The increase in such diseases is attributed to numerous factors including aging populations, unhealthy lifestyles, and improved medical care allowing individuals with acute conditions to live longer, leading to a rise in long-term health issues.
