

# Community Cloud Market Set to Surge to \$82.9 Billion by 2032 at a 33.6% CAGR

The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chains, regional landscapes, competitive scenarios

WILMINGTON, NEW CASTLE, DE, UNITED STATES, February 7, 2025 /EINPresswire.com/ -- The global [community cloud market](#) was valued at \$4.7 billion in 2022, and is projected to reach \$82.9 billion by 2032, growing at a CAGR of 33.6% from 2023 to 2032.

A community cloud, a kind of cloud infrastructure, meets the requirement of a particular community or group of organizations by allowing them to share resources and services based on common operational and regulatory requirements. Organizations can choose to host their own data centers and split the cost and responsibilities to set up a community cloud.

“

The growth of the global community cloud market is driven by rise in demand for infrastructure with high performance and increase in need to reduce the number of servers.

”

*Allied Market Research*

Community cloud market is expected to reach \$82.9 billion by 2032, growing at a CAGR of 33.6% (2023-2032).

Drivers, Restraints, and Opportunities-

Factors such as rise in demand for infrastructure with high performance and low latency, increase in need to reduce the number of servers and increase green computing, and rise in demand for security, compliance, and data

redundancy, primarily drive the growth of the community cloud market. However, governance and trust issues hamper the market growth to some extent. Moreover, rise in collaboration and information exchange between corporations is expected to provide lucrative opportunities for the market growth during the forecast period.

Community Cloud Market

By application, the cloud-based storage segment held the major share in 2022, garnering more than one-third of the global [community cloud market revenue](#), owing to reduce storage costs by sharing resources and dividing expenditures propels the market growth significantly. The cloud security and data privacy segment would also showcase the fastest CAGR of 37.6% during the forecast period, owing to create and provide cutting-edge security solutions, such as encryption, access controls, and threat detection systems, that are precisely suited to the requirements of communities or businesses.

By component, the hardware segment held the major share in 2022, garnering nearly half of the global community cloud market revenue, owing to particular needs of community cloud environments, such as storage systems, high-performance servers, and networking hardware, which propels the market growth significantly. The software segment would also showcase the fastest CAGR of 36.1% during the forecast period, owing to enable smooth integration, interoperability, and data sharing among various community cloud participants as more businesses and organizations use community cloud solutions.

Key players in the global community cloud market include:

- Google LLC
- IBM Corporation
- Microsoft Corporation
- Cisco Systems, Inc.
- DXC Technology Company
- Amazon Web Services, Inc.
- Broadcom
- Atos Se
- Akamai Technologies
- VMware, Inc

The report analyzes these key players in the global community cloud market. These players have adopted various strategies such as expansion, new product launches, partnerships, and others to increase their market penetration and strengthen their position in the industry. The report is helpful in determining the business performance, operating segments, developments, and product portfolios of every market player..
