What Are The Main Factors Propelling The Skytrofa Market?

Rising demand for hormone replacement therapy HRT is expected to bolster the growth of the skytrofa market going forward. Hormone replacement therapy is a treatment that substitutes hormones such as estrogen and progesterone to mitigate symptoms of menopause or hormonal imbalances. The ageing population fuels this surge for hormone replacement therapy HRT, coupled with its recognized benefits in managing menopause-related symptoms. Skytrofa, used in hormone replacement therapy, treats growth hormone deficiency through subcutaneous injections, stimulating growth and development. For instance, the National Health Service, a UK-based government department, disclosed that during 2022-23, 11 million items of HRT were prescribed, reflecting a 47% increase from the previous year. Additionally, an estimated 2.3 million patients were recipients of HRT prescriptions, marking a 29% increase from the previous year. Therefore, the rise in demand for hormone replacement therapy underpins the growth of the skytrofa market.
