

# ASAP Semiconductor Announces Expanded Commercial Aircraft Part Offerings on Purchasing Synergy with Updated ATA Catalogs

*In response to an increase of requisitions and shifting industry demand, Purchasing Synergy reveals updated commercial aircraft part offerings and catalogs.*

ANAHEIM, CA, UNITED STATES, February 7, 2025 /EINPresswire.com/ -- ASAP Semiconductor announced today a significant expansion of commercial aircraft part offerings that are available through its online procurement platform, Purchasing Synergy. This

initiative is stated to address an increasing demand for aviation components across the industry, with identified part types of need including aircraft hardware, fasteners, avionics, controls, window parts, and more. As a particular specialty of Purchasing Synergy is maintaining curated catalogs that allow customers to search for commercial [aircraft parts by ATA chapter](#) and group data, this initiative will also include further development of ATA resources to promote streamlined procurement.

“

With this initiative, we are enhancing access to aircraft fasteners, hardware, and other in-demand parts while optimizing our platform to better serve an evolving aviation industry.”

*Joe Faruqui*

Alongside continued supply chain disruptions that are limiting supply and affecting lead times, rising demand for [reliable commercial aircraft parts](#) across the industry is also being driven by a current trend of fleet modernization to retrofit aging aircraft, increased global air travel, technological advancement, and the strengthening of maintenance regulations. As operators, repair stations, and other industry professionals try to limit downtime and

control costs in the face of these factors, ASAP Semiconductor is turning to its targeted inventory expansion strategy for Purchasing Synergy, focusing on specific ATA chapters and groups with

the highest demand surges. By prioritizing these areas, the company attests that it will better be able to maintain availability of critical items with the preemptive sourcing from its trusted network of suppliers and manufacturers.

ASAP Semiconductor's data-driven approach to inventory management plays a central role in this expansion effort, with careful analysis of customer purchasing habits, industry trends, airframe data, and ATA listing resources all being leveraged to refine and optimize Purchasing Synergy's inventory. This approach aims to reduce the need for customers to browse multiple platforms for all they require, saving valuable time and promoting efficiency. As ATA catalogs are enhanced, prospective buyers will be provided with necessary data and documentation to carry out precise and accurate sourcing. By categorizing current and new aircraft part listings by ATA chapters, the platform seeks to simplify part identification, ensuring compatibility of purchases with specific [airframes and systems](#).

Internally, ASAP Semiconductor is continuing efforts to scale its operations to support expansion initiatives across platforms, increasing its workforce to meet a surge in requisitions. The company is moving forward with a focus on hiring sales and customer service representatives who specialize in aviation procurement, ensuring availability for all shopping on Purchasing Synergy. This is a part of ASAP Semiconductor's overarching goal of maintaining personalized service on all platforms, where customers are treated to one-on-one consultation and assistance through each stage of quotation and order fulfillment.

"Our inventory expansion efforts for Purchasing Synergy underscores our commitment to preemptively addressing customer needs with efficiency and precision," said Joe Faruqui, CEO of ASAP Semiconductor. "By focusing on the diversification of commercial aircraft part offerings and the refinement of ATA catalogs, we aim to provide a streamlined procurement experience that ensures operational success for our clients."

As ASAP Semiconductor continues to monitor market trends and purchasing patterns, it affirms that it will keep refining offerings on Purchasing Synergy to remain aligned with inventory management objectives.
