

Restaurant Point-of-Sale (POS) Terminals Market Expected to Reach USD 51.60 Billion by 2034 with a CAGR of 7.9%

The growing aggregate of cashless proceedings is driving the market demand.

NEW YORK CITY, NY, UNITED STATES, February 7, 2025 /EINPresswire.com/ -- The Restaurant Point-of-Sale (POS) Terminals Market is projected to reach a market size of USD 51.60 billion by 2034, growing at a CAGR of 7.9%. This growth is primarily driven by the increasing adoption of cashless payment systems and the demand for efficient, contactless transactions in the food and beverage industry.

According to Polaris Market Research, the market is expected to reach a market size of USD 51.60 billion by 2034, growing at a CAGR of 7.9%. This growth is primarily driven by the increasing adoption of cashless payment systems and the demand for efficient, contactless transactions in the food and beverage industry.

Key factors driving the market include:

A point-of-sale, also acknowledged as a POS system, is a physical space where dealings are processed. Several conventional table service restaurants have a physical cash register around the establishment. The region adjoining the cash register is point-of-sale. Sponsors can interchange physical cash or disburse through credit cards or smart wallets and trade money for the restaurant service.

They maximize sales operations and offer real-time business perspective.”
