

DriveSafe Online Launches Course to Cut Fuel Costs with Eco-Friendly Driving Habits

New Eco-Driving Course Teaches Employees How to Boost Fuel Efficiency by Up to 40%

WICHITA, KS, UNITED STATES, February 7, 2025 /EINPresswire.com/ --

Driving electric vehicles is a great way to be eco-friendly. But how drivers operate their current cars can also make a big difference? Eco-driving is all about adopting smart driving habits to reduce fuel consumption and emissions, benefiting both the environment and the bottom line.

“

By embracing eco-driving techniques, drivers can make an immediate and meaningful impact on both the environment and their fuel costs.”

Patrick Mileham

The U.S. Department of Energy reports that aggressive driving habits can reduce fuel economy by 10%-40% in stop-and-go traffic. For companies with multiple employee drivers, supporting positive and more efficient driving behavior can lead to significant savings and improved road safety.

“It's essential to recognize that our daily driving habits with conventional cars play a crucial role in environmental conservation,” said Patrick Mileham, DriveSafe Online

editorial director. “By embracing eco-driving techniques, drivers can make an immediate and meaningful impact on both the environment and their fuel costs.”

Fleets that prioritize eco-friendly driving practices can unlock significant financial benefits while reducing their environmental impact. By training employees to adopt fuel-efficient driving techniques, companies can lower fuel costs, decrease vehicle wear and tear, and extend the lifespan of their fleet.

For companies with two employees or two hundred, DriveSafe Online offers a mobile-friendly

[Eco-Driving Course](#) to help drivers adopt these beneficial habits. The program is designed to educate drivers on safe and efficient driving techniques by promoting behaviors that are both environmentally responsible and beneficial to road safety.
