Rise in bakery industry globally has driven the growth of the bakery enzymes market. This is attributable to surge in consumption of bakery products, especially the packaged variety. Furthermore, in past few years, increase has been witnessed in consumer demand for convenience food, including bakery products globally. This is attributed to rise in demand for convenience foods such as bread, rolls, cookies, and other bakery products, which require little or no further preparation by consumers before consumption.

Change in food habits and busy lifestyle of consumers, surge in disposable income, increase in working women population, and rapid digitization result in rise in number of quick service restaurants, thus increasing the demand for bakery products majorly breads & buns from these restaurants. Thus, rise in demand for bakery products has driven the need for bakery enzymes, which notably contribute toward the bakery enzymes market growth.
