Trident IoT's Z-Way Controller SDK Earns Certification from the Z-Wave Alliance

CARLSBAD, CA, UNITED STATES, February 12, 2025 /EINPresswire.com/ -- Trident IoT, a different kind of semiconductor company, proudly announces that its Z-Way controller SDK has been officially certified by the Z-Wave Alliance. This certification confirms Z-Way's compliance with the latest Z-Wave standards, ensuring robust interoperability and seamless integration for developers and manufacturers building Z-Wave-enabled smart home and IoT solutions.

Z-Way is Trident IoT's flexible and multi-protocol controller SDK designed to support Z-Wave networks with advanced functionality, multi-platform compatibility, and intuitive development tools. The certification from the Z-Wave Alliance affirms that Z-Way meets the highest industry benchmarks for security, performance, and reliability, reinforcing Trident IoT's commitment to empowering developers with best-in-class tools for IoT innovation.

> The Z-Wave Alliance is committed to ensuring interoperability and security within the Z-Wave ecosystem, and we are pleased to certify Trident IoT's Z-Way controller SDK."
> *Bettina Roll, Certification Program Manager for the Z-Wave Alliance*

"We are thrilled to receive Z-Wave Alliance certification for Z-Way," said Mariusz Malkowski, CTO at Trident IoT. "This milestone underscores our dedication to delivering high-quality, standards-compliant solutions that accelerate product development and bring cutting-edge smart home technologies to market faster."

"The Z-Wave Alliance is committed to ensuring interoperability and security within the Z-Wave ecosystem, and we are pleased to certify Trident IoT's Z-Way controller SDK," said Bettina Roll, Certification Program Manager for the Z-Wave Alliance. "As an alternate source for Z-Wave solutions, Trident IoT brings increased diversity, stability, and innovation to the market. Providing developers and manufacturers with more options accelerates the adoption of Z-Wave

technology."

With this certification, Trident IoT further strengthens its role as a key player in the IoT ecosystem, providing certified solutions that simplify development while ensuring compliance with industry-leading security and interoperability requirements.

About Trident IoT Trident IoT is a semiconductor company dedicated to simplifying IoT product development. Founded by industry veterans with over a century of combined experience, Trident IoT specializes in IoT silicon and tools, design and development support, and US-based certification services. Built by developers for developers, Trident IoT's mission is to enable businesses to bring products to market faster with simply better solutions.
