The surge in demand for online & remote learning tools and favorable government initiatives & corporate funding to promote smart education drive the growth of the market. In addition, an increase in the need for interactive and personalized learning environment fuels the growth of the smart education and learning market. However, a lack of digital literacy and skills and data privacy and security concerns limits the growth of this market. Conversely, the rise in the implementation of AR and VR technology in the education sector is anticipated to provide numerous opportunities for the expansion of the market during the forecast period.

The global smart education and learning market is segmented into component, learning mode, end user, and region. Based on component, the market is divided into software, services,

**SMART EDUCATION AND LEARNING MARKET**

OPPORTUNITIES AND FORECAST, 2023-2032

Smart education and learning market is expected to reach **\$1.4 Trillion** in 2032

Growing at a **CAGR of 18.4%** (2023-2032)

Based on the component, the software segment held the highest market share in 2022, accounting for nearly half of the global smart education and learning market revenue, owing to an increase in the need for personalized learning, enhanced accessibility, and delivering interactive and engaging content. However, the same segment is also projected to manifest the highest CAGR of 20.9% from 2023 to 2032.

Based on learning mode, the blended learning segment held the highest market share in 2022, accounting for more than one-third of the global smart education and learning market revenue, owing to, the rise in demand for cost-effective solutions in educational institutions to provide optimized resources. However, the adaptive learning segment is projected to manifest the highest CAGR of 23.2% from 2023 to 2032, due to the increasing adoption of adaptive learning systems to heighten the need for personalized learning experiences.

Based on end users, the academics segment accounted for the largest share in 2022, contributing to more than two-thirds of the global smart education and learning market revenue, due to numerous beneficial factors, including flexibility and accessibility. However, the corporate segment is expected to portray the largest CAGR of 20.7% from 2023 to 2032 and is projected to maintain its lead position during the forecast period, owing to increasing demand for the connectivity of learning infrastructure in the corporate sector with effective tools and platforms for employee training and development.

## COVID-19 Scenario

□ The smart education and learning market had witnessed stable growth during the COVID-19 pandemic, due to the increased demand for online learning solutions. Educational institutions, governments, and private investors allocated significant funds towards developing and expanding smart education infrastructure. There was a significant rise in investments in technology, software platforms, content creation, and digital learning resources.

□ Moreover, education technology companies were often seen to deploy technologies such as process automation and hybrid learning models to provide improved efficiency and reduce maintenance expenses during the outburst of the COVID-19 crisis.
