Some of the key facts of the Opioid Withdrawal Syndrome Market Report:

- The Opioid Withdrawal Syndrome market size was valued ~USD 1,302 million in 2022 and is anticipated to grow with a significant CAGR during the study period (2020-2034)
- In September 2024, Spark Biomedical, a pioneer in wearable neurostimulation technology, collaborated with renowned research and behavioral health organizations, Battelle Memorial Institute and Hazelden Betty Ford Foundation, to transform opioid use disorder (OUD) recovery treatments. Their partnership will focus on creating an artificial intelligence (AI) algorithm aimed at detecting and managing opioid withdrawal symptoms and cravings.
- In February 2024, Proniras, a clinical-stage biotechnology firm, concluded a successful Series B funding round totaling \$4.65 million. This financing will facilitate the Phase I clinical trial of PRN-001-01 (tezampanel), a novel treatment for opiate withdrawal. Tezampanel, the company's flagship program, is engineered to modulate glutaminergic signaling, focusing on aiding recovery from opioid addiction. Its mechanism targets the reduction of excessive brain activity within

circuits linked to drug withdrawal, addiction, and mental health disorders, all while avoiding direct interaction with the opioid system.

- In the 7MM, the majority of the Opioid Withdrawal Syndrome Market Share was held by opioid agonist-antagonists, generating approximately USD 1,107 million in 2022.
- In 2022, the US held the largest market share in the 7MM, accounting for 90% of the total market, followed by the UK, which is expected to experience growth during the forecast period (2023–2034).
- DelveInsight's analysis indicates that in 2022, there were approximately 9,264,786 cases of opioid misuse in the US. It is projected that these numbers will decrease significantly at a compound annual growth rate (CAGR) over the forecast period from 2023 to 2034.
- In 2022, within EU4 countries and the UK, the UK reported the highest number of cases of long-term opioid usage at 339,351, while Spain recorded the lowest with 61,871 cases. It is anticipated that these cases will decrease across EU4 and the UK.
- The number of cases of Opioid Withdrawal Symptoms in Japan was reported to be 160,278 in 2022, with projections indicating a decrease to 135,570 cases by 2034.
- DelveInsight forecasts that the number of cases of opioid misuse in EU4 and the UK will decline from 1,422,332 cases in 2022 to approximately 1,051,533 cases by 2034. The projected decrease is expected to occur at a compound annual growth rate (CAGR) of -2.1% during the forecast period from 2023 to 2034.
- Key Opioid Withdrawal Syndrome Companies: DemeRx IB, Inc./atai Life Sciences, MediciNova, BioXcel Therapeutics Inc., USWM, LLC (dba US WorldMeds, Thomas Jefferson University, and others
- Key Opioid Withdrawal Syndrome Therapies: DMX-1002 (Ibogaine HCl), MN-166, BXCL501, Standard of Care with Lofexidine, Buprenorphine Injection, Dexmedetomidine, and others
- The Opioid Withdrawal Syndrome market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Opioid Withdrawal Syndrome pipeline products will significantly revolutionize the Opioid Withdrawal Syndrome market dynamics.

## Opioid Withdrawal Syndrome Overview

Opioid Withdrawal Syndrome refers to a set of symptoms that occur when a person who has become dependent on opioids (such as prescription pain relievers, heroin, or fentanyl) abruptly stops or reduces their use. Symptoms may include anxiety, irritability, muscle aches, sweating, nausea, vomiting, diarrhea, and difficulty sleeping. The severity and duration of withdrawal can vary depending on the opioid used and the individual's level of dependence.

## Opioid Withdrawal Syndrome Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted

epidemiology trends in the seven major countries (7MM) from 2020 to 2034. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

#### Opioid Withdrawal Syndrome Epidemiology Segmentation:

The Opioid Withdrawal Syndrome market report proffers epidemiological analysis for the study period 2020–2034 in the 7MM segmented into:

- Total Prevalence of Opioid Withdrawal Syndrome
- Prevalent Cases of Opioid Withdrawal Syndrome by severity
- Gender-specific Prevalence of Opioid Withdrawal Syndrome
- Diagnosed Cases of Episodic and Chronic Opioid Withdrawal Syndrome

#### Opioid Withdrawal Syndrome Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Opioid Withdrawal Syndrome market or expected to get launched during the study period. The analysis covers Opioid Withdrawal Syndrome market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Opioid Withdrawal Syndrome Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

#### Opioid Withdrawal Syndrome Therapies and Key Companies

- DMX-1002 (Ibogaine HCl): DemeRx IB, Inc./atai Life Sciences
- MN-166: MediciNova
- BXCL501: BioXcel Therapeutics Inc.
- Standard of Care with Lofexidine: USWM, LLC (dba US WorldMeds)
- Buprenorphine Injection: Thomas Jefferson University
- Dexmedetomidine: BioXcel Therapeutics Inc

#### Opioid Withdrawal Syndrome Market Strengths

- Globally, there is a growing recognition of the opioid crisis, which has raised awareness about opioid withdrawal syndrome and the need for effective treatments.
- Pharmaceutical companies are investing in research and development aimed at creating more effective and safer treatments for opioid withdrawal, including medications and behavioral

therapies.

- Government initiatives and regulations prioritize opioid withdrawal management, fostering market growth.

### Opioid Withdrawal Syndrome Market Opportunities

- The shift towards precision medicine offers possibilities for developing targeted treatments, allowing for more effective and personalized interventions in OWS management.
- The high prevalence of opioid addiction creates a significant market demand for withdrawal syndrome treatments, providing opportunities for companies operating in this space.
- The current and emerging market is dominated by buprenorphine-based products, hence introduction of a therapy with a novel mechanism can lead to significant market growth.

### Scope of the Opioid Withdrawal Syndrome Market Report

- Study Period: 2020–2034
- Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]
- Key Opioid Withdrawal Syndrome Companies: DemeRx IB, Inc./atai Life Sciences, MediciNova, BioXcel Therapeutics Inc., USWM, LLC (dba US WorldMeds, Thomas Jefferson University, and others
- Key Opioid Withdrawal Syndrome Therapies: DMX-1002 (Ibogaine HCl), MN-166, BXCL501, Standard of Care with Lofexidine, Buprenorphine Injection, Dexmedetomidine, and others
- Opioid Withdrawal Syndrome Therapeutic Assessment: Opioid Withdrawal Syndrome current marketed and Opioid Withdrawal Syndrome emerging therapies
- Opioid Withdrawal Syndrome Market Dynamics: Opioid Withdrawal Syndrome market drivers and Opioid Withdrawal Syndrome market barriers
- Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies
- Opioid Withdrawal Syndrome Unmet Needs, KOL's views, Analyst's views, Opioid Withdrawal Syndrome Market Access and Reimbursement
