Some of the key facts of the Trigeminal Neuralgia Market Report:

- The Trigeminal Neuralgia market size is anticipated to grow with a significant CAGR during the study period (2019-2032)
- In August 2024, Noema Pharma AG, a clinical-stage biotech company developing innovative therapies for severe neuroscience-related disorders, announced the completion of enrollment for the GALENE Phase 2B trial. This double-blind, placebo-controlled study is assessing the efficacy of NOE-101 in managing seizures associated with tuberous sclerosis complex (TSC). NOE-101, also known as basimglurant, is a potent inhibitor of metabotropic glutamate receptor 5 (mGluR5) and is also being clinically investigated for the treatment of trigeminal neuralgia.
- The National Organisation for Rare Disorders (NORD) reports that women are slightly more likely than men to experience trigeminal neuralgia. Although the actual incidence is unknown, the United States sees between 10,000 and 15,000 new cases annually
- According to a study by Lambru et al. (2020), the yearly incidence of TN is projected to be 4-29 per 100 000 person-years, while the lifetime prevalence is estimated to be 0.16%-0.3%. Women

are more likely than men to have it. With a mean age of onset of 53–57 years and a range of 24–93 years in adult series, the incidence rises with age

- Key Trigeminal Neuralgia Companies: Noema Pharma AG, Biohaven Pharmaceuticals, Biogen, Eli Lilly and Company, Novartis, and others
- Key Trigeminal Neuralgia Therapies: Basimglurant, Rimegepant, CNV1014802, Galcanezumab, COA566, and others
- The Trigeminal Neuralgia market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Trigeminal Neuralgia pipeline products will significantly revolutionize the Trigeminal Neuralgia market dynamics.

### Trigeminal Neuralgia Overview

The trigeminal nerve, or fifth cranial nerve, is one of the most extensively dispersed nerves in the head and is affected by the chronic pain syndrome known as trigeminal neuralgia (TN), sometimes known as tic douloureux. It falls within the category of neuropathic pain, which can be divided into two categories: primary (idiopathic) and secondary.
