Over the last decade, the demand for organic energy bars, particularly in developed regions, has increased significantly, resulting in availability of a wide variety of organic energy bars. While consumers' consumption patterns for organic energy bars vary, organic energy bars are increasingly being consumed to compensate for various nutrient deficiencies caused by lack of adequate intake of nutritious food. Furthermore, numerous consumers are replacing their traditional breakfast with organic energy bars such as protein bars. Although the popularity of organic energy bars is increasing, brands are increasingly focusing on limiting sugar content and fortification of minerals in their products, which acts as a key driving force of the global energy bar market. Organic energy bars have gradually emerged as a meal replacement alternative in several parts of the world. Furthermore, the consumption of organic energy bars among athletes, sportsmen, and women coupled with increase in number of paid partnerships with social media influencers is expected to boost the overall sales of organic energy bars globally.

Increase has been witnessed in the number of users of various social media sites and other informative and browsing websites coupled with rise in internet penetration. This increase in user base even includes children from the average age of 13 and above. With increased digitalization and internet becoming useful source to impart product knowledge, engaged

players in the market can strategize on advertising and promoting their products on various social media platforms. Active players in the industry are now promoting their products on social media platforms to impart awareness as well as differentiating features such as value-added nutritional, flavors, and convenience about their product offerings.
