The increasing prevalence of cancer is expected to fuel the growth of the voraxaze or megludase market going forward. Cancer, a group of diseases characterized by the uncontrolled growth and spread of abnormal cells in the body, has seen an increasing number of cases due to aging populations, lifestyle changes, environmental exposures, and improved detection methods. Voraxaze megludase is instrumental in treating high methotrexate toxicity in cancer patients, thus reducing severe side effects during chemotherapy. In January 2024, as per the reports from the American Cancer Society, a US-based nonprofit cancer advocacy organization, the number of cancer cases in the USA is predicted to rise to 2,001,140 in 2024 from 1,958,310 in 2023, reflecting a growth of 2.19% which demonstrates the simultaneous growth of the voraxaze or megludase market.
