

Expert View: Graphene Composites Market to Experience Unprecedented Growth, Reaching \$109.4M by 2027

The global graphene composites market size is projected to reach \$109.4 million by 2027, growing at a CAGR of 37.5% from 2020 to 2027.

WILMINGTON, DE, UNITED STATES, February 11, 2025 /EINPresswire.com/ -- According to a report by Allied Market Research, the global [graphene composites market](#) is expected to reach \$109.4 million by 2027, growing at a CAGR of 37.5% from 2020 to 2027. It was evaluated at \$13.1 million in 2019. Along with providing exhaustive quantitative research of the industry, the report also offers a detailed study of the market dynamics, segments, industry trends, and future investment pockets in various regions. □

Competitive scenario □ □

Graphmatech AB

NanoXplore Inc

XG Sciences, Inc

Gnanomat SL

Graphene Composites

AD-NANO TECHNOLOGIES PVT LTD.

Haydale Graphene Industries plc

G6 Materials Corp

Graphenano Group

Graphene One LLC

A thorough scrutiny of the major players across the landscape assists stakeholders in identifying the gaps and underserved segments. Business owners can explore their portfolios and develop their revenue streams by expanding into new markets.

Regional insights

Asia-Pacific is projected to lead the market, capturing a 38.1% share during the forecast period, driven by its extensive base of manufacturers and consumers. The region's growth is fueled by increasing production in sectors like automotive, marine, defense, and aerospace. China is anticipated to be a major player, supported by government initiatives that promote investment in graphene manufacturing and R&D. Meanwhile, North America is expected to see substantial growth in the composites sector due to rising demand from the aircraft and automotive industries. Major aircraft manufacturers such as Boeing are focusing on lightweight materials like graphene to enhance efficiency. The U.S., a leading market and exporter of graphene products, is witnessing increased collaborations between manufacturers and research institutions, further advancing R&D activities.

Demand for lightweight material boosting the growth

The demand for lightweight materials is significantly boosting the market for graphene composites. These composites are highly sought after in the aerospace and automotive sectors due to their superior thermal durability, electrical conductivity, stiffness, and lightweight properties. Graphene composites and similar advanced materials decrease fuel consumption in modern vehicles, all while maintaining performance and safety standards. Compared to conventional materials like steel and cast iron, graphene composites and other lightweight options, such as magnesium alloys and high-strength steel, require less energy for production, further driving their adoption and market growth.

Industry highligh

In 2022, Graphene Composites agreed with NASA to provide one of their patented nanomaterial

products for use in research and development initiatives. Additionally, in the same year, Graphene Composites developed a novel coating known as GC Haloä, designed for air filters, which eliminates viruses and bacteria upon contact.

In the same year, Thomas Swan partnered with Concrene Ltd. to incorporate graphene nanoplatelets into concrete dispersions managed by Concrene Ltd. This collaboration aimed to develop high-compressive strength concrete and extend the global application of Thomas Swan's products. The agreement was designed to broaden the reach and impact of Thomas Swan's innovations in the concrete industry.

To sum up, the report details the trends and outlook of the graphene composites market from 2020 to 2027, aiming to identify current opportunities and potential investment areas. It uses Porter's Five Forces analysis to assess the influence of buyers, suppliers, and the competitive landscape on industry strategies. Additionally, it provides a comprehensive examination of the factors influencing the growth of the graphene composites market, helping businesses to get a clear picture of the landscape.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
