What Key Factors are Driving the Alcohol-Based Disinfectants Market Growth?

The escalating concerns regarding health and hygiene play a pivotal role in driving the alcohol-based disinfectants market forward. As global awareness about disease prevention and the significance of maintaining cleanliness to prevent infections spreads, the demand for alcohol-based disinfectants escalates. These disinfectants, with their primary component of ethanol or isopropanol, quickly neutralize a wide range of pathogens by disrupting their cellular membranes. This becomes especially critical considering that by 2022, a staggering 3.5 billion people lacked access to safely managed sanitation, and 2 billion lacked essential hygiene services, according to a July 2023 report by the United Nations Water.
