## Key Players:

- Cobham Limited
- Advanced Navigation and Positioning Corporation
- BAE Systems
- Endeavor Business Media, LLC.
- L3Harris Technologies, Inc.
- Intelcan Technosystems Inc
- Lockheed Martin Corporation
- Indra
- Northrop Grumman
- Verdict Media Limited.
- RTX, Thales

- Searidge Technologies

## Market Analysis by Product and Application: Communication Equipment and Commercial Aircrafts Lead the Way in 2023

**By Product:** In 2023, the communication equipment segment held a market share of 38.05%. Air traffic control (ATC) organizations use the digitization of the data communication equipment for all of their communications and the replacement rate of the obsolete equipment has increased due to the cost of digitized data communication. The rising threat of cyberattacks on sensitive air traffic data has prompted airports to upgrade their surveillance and communications systems.

**By Application:** The commercial aircraft segment held the largest market share of 39.72% in 2023. The increase in the volume of air traffic and the rise in the number of flights around the world has escalated the demand for modernized air traffic control systems, thus, significantly adding to the growth of the market.

Asia Pacific accounted for the largest market share of 34.07% in 2023.

The region's rapid economic development has stimulated a surge in both business and leisure travel, creating high demand for air travel services. Becoming ever more affluent, families have more disposable income and airline travel is increasingly within reach for many. In recent years, the region has experienced significant economic and aviation growth; as the aviation industry emerges from the global pandemic, Asia Pacific can take the lead in global economic growth. This trend is expected to continue and further fuel the demand for air traffic control systems and equipment. Hence, the Asia Pacific region is a vital market opportunity for players, attributed to their focus on innovation, modernization of infrastructure, and long-term economic growth.

### Recent Developments

- In April 2023: Boeing took a major step in advancing sustainable aviation technology by expanding its ecoDemonstrator program. The company introduced a series of specially modified aircraft, called 'Explorer' airplanes, to further its flight-testing initiatives. These aircraft will serve as a platform for testing and validating new technologies aimed at reducing environmental impacts.

### About Us:

SNS Insider is a global leader in market research and consulting, shaping the future of the industry. Our mission is to empower clients with the insights they need to thrive in dynamic

environments. Utilizing advanced methodologies such as surveys, video interviews, and focus groups, we provide up-to-date, accurate market intelligence and consumer insights, ensuring you make confident, informed decisions.
