

RefillGenie Now Guarantees Same-Day Refills

Leading telehealth platform offers guaranteed same-day medication refills for chronic conditions with turnaround times as fast as 4 hours.

JERSEY CITY, NJ, UNITED STATES, February

12, 2025 /EINPresswire.com/ -- [RefillGenie](#), a telehealth company founded by physicians, today announced its guaranteed [same-day prescription refill service](#) to help patients maintain consistent access to their vital medications. The service now operates across 45 states, providing essential medication refills with turnaround times as quickly as 4 hours.

"We created RefillGenie because we were tired of seeing patients suffer from preventable complications simply because they couldn't refill their blood pressure medications," said Dr. Stephen Kelly, Founder of RefillGenie. "Our text-based service ensures that anyone can access their life-saving medications when needed, particularly during gaps in care or insurance coverage."

The service addresses a critical health need for patients managing chronic conditions who may find themselves between doctors, insurance plans, or facing unexpected life events. With a standard turnaround time of 12 hours and an express 4-hour option, RefillGenie helps prevent dangerous lapses in medication schedules.

Marla, a recent patient, shared her experience: "Such a lifesaver! Needed refill of my maintenance med and lost my insurance and within a few hours of contacting RefillGenie, I had my meds! Thank you!!!!!"

The company prioritizes patient safety while maintaining accessibility. While certain medications like controlled substances and those requiring blood level monitoring are excluded, RefillGenie provides free lab orders and result interpretation when necessary for safe prescription refills.

"Fast, professional service. I will definitely recommend!!" said Julie T., highlighting the efficiency of the service.

The company's expansion across 45 states makes it accessible to patients from California to Maine, ensuring broader access to medication refills. Patient Jeremiah G. noted, "All of the individuals that I have interacted with have been extremely kind and accommodating. I would

recommend this service to anyone who needs it."

RefillGenie emphasizes that their service is designed to complement, not replace, primary care relationships. The platform serves as a bridge during healthcare transitions, helping prevent dangerous lapses in medication schedules.

RefillGenie is not an online pharmacy. It is a telehealth platform where customers can interact with a board-certified physician via encrypted text chat; if approved, the physician sends a prescription for a refill of an existing medication. Proof of a previous prescription is required. To learn more about RefillGenie's services, call +1 (929)-274-3052. ###

About RefillGenie Inc.

The physician founders of RefillGenie (<https://refillgenie.com/about-us/>) were tired of seeing patients suffer from strokes and heart attacks simply because they were unable to refill their blood pressure medication. For that reason, they created a simple, text-based service to ensure anyone can access their life-saving medications, even when in-between doctors or insurance plans.
