

STAT Inhibitors Clinical Trials and Studies: EMA, PDMA, FDA Approvals, Mechanism of Action, ROA, NDA, IND, and Companies

STAT Inhibitors Pipeline

LAS VEGAS, NV, UNITED STATES, February 12, 2025 /EINPresswire.com/ -- DelveInsight's, "STAT Inhibitors Pipeline Insight" report provides comprehensive insights about 20+ companies and 25+ pipeline drugs in STAT Inhibitors pipeline landscape. It covers the STAT Inhibitors pipeline drug profiles, including clinical and nonclinical stage products. It also covers the STAT Inhibitors therapeutics assessment by product type, stage, route of administration, and molecule type. It further highlights the inactive STAT Inhibitors pipeline products in this space.

STAT Inhibitors Pipeline

Stay ahead with the latest insights! Download DelveInsight's comprehensive STAT Inhibitors Pipeline Report to explore emerging therapies, key STAT Inhibitors Companies, and future STAT Inhibitors treatment landscapes @ [STAT Inhibitors Pipeline Outlook Report](#)

Key Takeaways from the STAT Inhibitors Pipeline Report

- In February 2025:- Amgen:- A Phase 3, Randomized, 24-week, Placebo-controlled, Double-blind Study to Assess the Efficacy, Safety, and Tolerability of Rocatinlimab (AMG 451) in Combination With Topical Corticosteroids and/or Topical Calcineurin Inhibitors in Adult Subjects With Moderate-to-severe Atopic Dermatitis (AD) (ROCKET-SHUTTLE)
- DelveInsight's STAT Inhibitors pipeline report depicts a robust space with 20+ active players working to develop 25+ pipeline therapies for STAT Inhibitors treatment.
- The leading STAT Inhibitors Companies such as Jiangsu HengRui Medicine Co., Ltd, NeuroBo Pharmaceuticals, Purple Biotech, Vividion Therapeutics, WPD Pharmaceuticals, Recludix Pharma, Hyundai Bioscience, ANA Therapeutics, UNION Therapeutics, Tvardi Therapeutics, Proteovant Therapeutics and others.
- Promising STAT Inhibitors Therapies such as Rocatinlimab, Efavirenz, Lamivudine, Stavudine,

Betnovate, and others.

Discover how the STAT Inhibitors treatment paradigm is evolving. Access DelveInsight's in-depth STAT Inhibitors Pipeline Analysis for a closer look at promising breakthroughs @ [STAT Inhibitors Clinical Trials and Studies](#)

STAT Inhibitors Emerging Drugs Profile

- SHR0302: Jiangsu HengRui Medicine Co., Ltd

SHR0302 is a potent and highly selective Janus kinase type 1 (JAK1) inhibitor. Several late-stage clinical studies are on-going with both oral and topical dosage forms for several immune-inflammatory diseases including atopic dermatitis, alopecia areata vitiligo, ulcerative colitis, and Crohn's disease. The high selectivity of SHR0302 may potentially provide a favorable safety and efficacy profile compared to the pan-JAK inhibitors. SHR0302 was granted Breakthrough Therapy designation by China's CDE for treatment in atopic dermatitis in January 2021. Currently, the drug is in Preregistration stage of its development for the treatment of Atopic dermatitis.

- ANA001: NeuroBo Pharmaceuticals

ANA001 is a proprietary oral niclosamide formulation in development as a treatment for patients with COVID-19. Niclosamide has antiviral and anti-inflammatory properties, and a well-understood safety profile in humans. ANA001 is currently being studied in a 60-subject Phase II clinical trial conducted in the U.S. Niclosamide has demonstrated both antiviral and immunomodulatory activity with possible downstream effects on coagulation abnormalities observed in COVID-19. In preclinical research by an independent academic group published in Antimicrobial Agents and Chemotherapy, niclosamide inhibited viral replication in vitro and was more potent than remdesivir in the same assay. Currently, the drug is in Phase II/III stage of its development for the treatment of COVID infections.

- NT219: Purple Biotech

NT219 is a first-in-class, small molecule that promotes Insulin Receptor Substrates 1/2 (IRS) degradation and inhibits Signal Transducer and Activator of Transcription 3 (STAT3) phosphorylation, two major complementary signaling pathways that play a key role in the tumor and its microenvironment. IRS1/2 acts as scaffolds, organizing signaling complexes that mediate mitogenic, metastatic, angiogenic, and anti-apoptotic signals from IGF1R and other oncogenes, consisting of an important driver in multiple cancers and is highly involved in triggering drug resistance. STAT3 is a transcription factor that is broadly hyper activated in many cancers, promoting proliferation, survival, angiogenesis, metastasis, and tumor immune evasion. Feedback activation of STAT3 plays a prominent role in mediating drug resistance to various anti-cancer therapies. As an inhibitor of both IRS1/2 and STAT3, NT219 has the potential to prevent the development of resistance to multiple approved therapies. Currently, the drug is in Phase I/II stage of its development for the treatment of colorectal cancer.

The STAT Inhibitors pipeline report provides insights into

- The report provides detailed insights about companies that are developing therapies for the

treatment of STAT Inhibitors with aggregate therapies developed by each company for the same.

- It accesses the Different therapeutic candidates segmented into early-stage, mid-stage, and late-stage of development for STAT Inhibitors Treatment.
- STAT Inhibitors Companies are involved in targeted therapeutics development with respective active and inactive (dormant or discontinued) projects.
- STAT Inhibitors Drugs under development based on the stage of development, route of administration, target receptor, monotherapy or combination therapy, a different mechanism of action, and molecular type.
- Detailed analysis of collaborations (company-company collaborations and company-academia collaborations), licensing agreement and financing details for future advancement of the STAT Inhibitors market.

Get a detailed analysis of the latest innovations in the STAT Inhibitors pipeline. Explore DelveInsight's expert-driven report today! @ [STAT Inhibitors Unmet Needs](#)

STAT Inhibitors Companies

Jiangsu HengRui Medicine Co., Ltd, NeuroBo Pharmaceuticals, Purple Biotech, Vividion Therapeutics, WPD Pharmaceuticals, Recludix Pharma, Hyundai Bioscience, ANA Therapeutics, UNION Therapeutics, Tvardi Therapeutics, Proteovant Therapeutics and others.

STAT Inhibitors pipeline report provides the therapeutic assessment of the pipeline drugs by the Route of Administration. Products have been categorized under various ROAs such as

- Oral
- Intravenous
- Subcutaneous
- Parenteral
- Topical

STAT Inhibitors Products have been categorized under various Molecule types such as

- Recombinant fusion proteins
- Small molecule
- Monoclonal antibody
- Peptide
- Polymer
- Gene therapy

Download DelveInsight's latest report to gain strategic insights into upcoming STAT Inhibitors Therapies and key STAT Inhibitors Developments @ STAT Inhibitors Market Drivers and Barriers, and Future Perspectives- https://www.delveinsight.com/sample-request/stat-inhibitors-pipeline-insight?utm_source=einpresswire&utm_medium=pressrelease&utm_campaign=ypr

Scope of the STAT Inhibitors Pipeline Report

- Coverage- Global
- STAT Inhibitors Companies- Jiangsu HengRui Medicine Co., Ltd, NeuroBo Pharmaceuticals, Purple Biotech, Vividion Therapeutics, WPD Pharmaceuticals, Recludix Pharma, Hyundai Bioscience, ANA Therapeutics, UNION Therapeutics, Tvardi Therapeutics, Proteovant Therapeutics and others.
- Promising STAT Inhibitors Therapies- Rocatinlimab, Efavirenz, Lamivudine, Stavudine, Betnovate, and others.
- STAT Inhibitors Therapeutic Assessment by Product Type: Mono, Combination, Mono/Combination
- STAT Inhibitors Therapeutic Assessment by Clinical Stages: Discovery, Pre-clinical, Phase I, Phase II, Phase III

Which companies are leading the race in STAT Inhibitors drug development?
