

Pancreatic Ductal Adenocarcinoma Market Set for Significant Expansion by 2032 | DelveInsight

Leading companies like Cardiff Oncology, XOMA, and Alphamab are spearheading advancements, redefining patient treatment possibilities.

LAS VEGAS , NV, UNITED STATES, February 12, 2025 /EINPresswire.com/ -- DelveInsight's "Pancreatic Ductal Adenocarcinoma Market Insights, Epidemiology, and Market Forecast-2032" report offers an in-depth understanding of Pancreatic Ductal Adenocarcinoma, including historical and forecasted epidemiology, as well as Pancreatic Ductal Adenocarcinoma market trends in the United States, EU4 (Germany, Spain, Italy, France), the United Kingdom, and Japan.

The latest healthcare forecast report delivers a comprehensive analysis of Pancreatic Ductal Adenocarcinoma, offering critical insights into its prevalence, revenue trends, and evolving treatment options for it. The report discusses key statistics, including current and projected market sizes, while delving into Pancreatic Ductal Adenocarcinoma symptoms and their impact on patients' quality of life.

It evaluates the progress and effectiveness of emerging therapies for Pancreatic Ductal Adenocarcinoma alongside an in-depth examination of the clinical trial landscape. This includes a detailed review of ongoing and upcoming studies that are set to shape the future of Pancreatic Ductal Adenocarcinoma treatment. With its rich data and forward-looking insights, this report serves as an indispensable resource for understanding market dynamics and advancements in Pancreatic Ductal Adenocarcinoma.

To Know in detail about the Pancreatic Ductal Adenocarcinoma market outlook, drug uptake, treatment scenario, and epidemiology trends, Click here: [Pancreatic Ductal Adenocarcinoma Market Forecast Report](#)

Some of the key insights of Pancreatic Ductal Adenocarcinoma Market Report:

- As per DelveInsight, the Pancreatic Ductal Adenocarcinoma (PDAC) market is expected to grow at a healthy rate during the forecast period (2023–2032), driven by the launch of new therapies and an increase in cases.
- Globally, PDAC is the 12th most common cancer, with a rising incidence, and it ranks as the 7th most lethal cancer worldwide.

- There are approximately 495,773 new cases of PDAC diagnosed each year globally.
- In January 2025, Innovent Biologics announced that China's NMPA granted Breakthrough Therapy Designation (BTD) for IBI343, a TOPO1i anti-CLDN18.2 ADC, as a monotherapy for CLDN18.2-positive advanced PDAC patients who have progressed after at least one prior treatment.
- Emerging therapies for PDAC include Onvansertib, Nadunolimab, Zimberelimab, NIS 793, CEND 1, DCC-3116, RMC-6236, and others.
- Key companies in the PDAC market include Cardiff Oncology, XOMA, Alphamab, Cantargia, RenovoRx, Syntrix Biosystems, Eucure Biopharma, Panbela Therapeutics, Jeil Pharmaceutical, Elicio Therapeutics, Cend Therapeutics, SignalChem Lifesciences, Bristol-Myers Squibb, AstraZeneca, REVOLUTION Medicines, Arcus Biosciences, ZielBio, Surface Oncology, Incyte Corporation, I-Mab Biopharma, Medicenna Therapeutics, Tarveda Therapeutics, and others.

Pancreatic Ductal Adenocarcinoma Overview

Pancreatic ductal adenocarcinoma (PDAC) is one of the most lethal diseases, with an average 5-year survival rate of less than 10%. Unfortunately, the majority of patients have unresectable, locally advanced, or metastatic disease at the time of diagnosis. PDAC development is associated with a poor prognosis due to its complicated and multifactorial nature. There is a lack of simple, early detection methods and is typically diagnosed at a late stage because symptoms do not appear until the disease has progressed and metastasized to distinct sites. The major difficulties in treating pancreatic cancer lie at both the genetic and cellular levels. The extent of mutational changes in pancreatic tumors generates gene instability that appears to play an essential role in PDAC tumor growth and resistance to treatments.

Pancreatic Ductal Adenocarcinoma Epidemiology

The epidemiology section offers an overview of historical, current, and projected trends in the seven major countries (7MM) from 2019 to 2032. It helps identify the factors influencing these trends by examining various studies and perspectives from key opinion leaders. Additionally, the section provides an in-depth analysis of the diagnosed patient population and future trends.

The Pancreatic Ductal Adenocarcinoma market report proffers epidemiological analysis for the study period 2019–2032 in the 7MM segmented into:

- Total Prevalent Cases of Pancreatic Ductal Adenocarcinoma
- Diagnosed Prevalent Cases of Pancreatic Ductal Adenocarcinoma
- Treated Cases of Pancreatic Ductal Adenocarcinoma

Pancreatic Ductal Adenocarcinoma Drugs Uptake and Pipeline Development Activities

The drug uptake section examines the adoption rates of newly launched and upcoming Pancreatic Ductal Adenocarcinoma drugs over the study period. It analyzes the uptake of these treatments, evaluating how patients adopt these therapies and the sales performance of each drug. This section offers a comprehensive look at the factors influencing the acceptance and success of Pancreatic Ductal Adenocarcinoma treatments in the market.

In addition, the therapeutics assessment section highlights the Pancreatic Ductal Adenocarcinoma drugs that have experienced the fastest uptake. It delves into the key drivers behind their widespread use and provides a market share comparison among these drugs. This section helps identify which therapies are gaining traction and the reasons behind their rapid adoption.

The report further explores the Pancreatic Ductal Adenocarcinoma pipeline, providing insights into therapeutic candidates at different stages of development. It identifies the key companies involved in creating targeted Pancreatic Ductal Adenocarcinoma treatments. The report also covers recent developments in the field, including collaborations, mergers, acquisitions, licensing agreements, and other significant updates on emerging therapies for Pancreatic Ductal Adenocarcinoma.

Pancreatic Ductal Adenocarcinoma Market Outlook

The Restless Leg Syndrome (RLS) market outlook in the report provides a comprehensive understanding of the past, present, and projected market trends, assessing the influence of existing treatments, unmet medical needs, market drivers and challenges, and the growing demand for advanced therapeutic solutions.

This section offers an in-depth analysis of the Restless Leg Syndrome market landscape, covering both approved treatments and late-stage pipeline therapies. It evaluates their market impact based on factors such as annual treatment costs, inclusion and exclusion criteria, mechanisms of action, patient compliance, rising demand, expanding patient population, anticipated launch timelines, competitive dynamics, brand positioning, and insights from key opinion leaders (KOLs). The report presents detailed market data through tables and graphs, providing a clear and structured view of market trends and future projections.

Pancreatic Ductal Adenocarcinoma Market Drivers

- The increasing development of novel treatment approaches, including targeted therapies and immunotherapies, is expanding options for PDAC, a historically difficult-to-treat cancer.
- Growing awareness and advancements in diagnostic techniques, such as liquid biopsies and biomarker-based screenings, are leading to earlier detection and improved treatment outcomes.

Pancreatic Ductal Adenocarcinoma Market Barriers

- The financial burden of advanced therapies, coupled with limited access to specialized

treatment centers, restricts patient adoption and affects market growth.

- PDAC is often diagnosed at an advanced stage due to a lack of early symptoms, making treatment less effective and limiting therapeutic advancements.

Scope of the Pancreatic Ductal Adenocarcinoma Market Report

- Study Period: 2019–2032
- Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan].
- Key Pancreatic Ductal Adenocarcinoma Companies: Cardiff Oncology, XOMA, Alphamab, Cantargia, RenovoRx, Syntrix Biosystems, Eucure Biopharma, Panbela Therapeutics, Jeil Pharmaceutical, Elicio Therapeutics, Cend Therapeutics, SignalChem Lifesciences, Bristol-Myers Squibb, AstraZeneca, REVOLUTION Medicines, Arcus Biosciences, ZielBio, Surface Oncology, Incyte Corporation, I-Mab Biopharma, Medicenna Therapeutics, Tarveda Therapeutics, and others.

Key Pancreatic Ductal Adenocarcinoma Drugs: Onvansertib, Nadunolimab, Zimberelimab, NIS 793, CEND 1, DCC-3116, RMC-6236, and others.

- Pancreatic Ductal Adenocarcinoma Therapeutic Assessment: Pancreatic Ductal Adenocarcinoma currently marketed, and Pancreatic Ductal Adenocarcinoma emerging therapies.
- Pancreatic Ductal Adenocarcinoma Market Dynamics: Pancreatic Ductal Adenocarcinoma market drivers and Pancreatic Ductal Adenocarcinoma market barriers.
- Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies.
- Pancreatic Ductal Adenocarcinoma Unmet Needs, KOL's views, Analyst's views, Pancreatic Ductal Adenocarcinoma Market Access and Reimbursement.
