

New Breakthrough in Natural Hair Regrowth Treatment

BEVERLY HILLS, CA, UNITED STATES, February 13, 2025 /EINPresswire.com/ -- After more than 20 years of research, [AlviArmani](#) Research Institute, an international leader in medical and surgical hair restoration is proud to unveil Trichological Revolution - 6 (TR6), a breakthrough in natural hair regrowth. This patented technology pairs cutting-edge science with nature's power to deliver results that sets a new standard in hair health and hair loss treatments.

Our biomedical research team has been dedicated to creating a solution that is both natural and incredibly effective. TR6 represents the future of hair regrowth technology.”

*Ashkan Hayatdavoudi MD JD,
CEO at AlviArmani Research
Institute*

TR6 is the result of a meticulous, multi-phase process designed to uncover the most effective bioactives for natural hair growth. Researchers started by evaluating crude extracts from over 100 natural products, each historically known to influence healthy hair growth. Through clinical testing, the team identified the most effective botanicals and refined it further. Its components were isolated, studied, and optimized molecule by molecule. The result is a potent mix of bioactives, carefully combined and dosed for optimal results.

Clinical trials and PCR-based studies have demonstrated that TR6 stimulates new hair growth in a way that natural solutions never have before. The patented formula is effective and backed by decades of rigorous research on hair follicles and human dermal papilla cells. Incorporated into AlviArmani operative solutions globally, it is and has been pivotal in AlviArmani’s industry leading hair restoration results and patient recovery worldwide.

“We’re thrilled to finally bring TR6 to market after years of exhaustive work,” said Ashkan Hayatdavoudi MD JD, CEO at AlviArmani Research Institute. “Our biomedical research team has been dedicated to creating a solution that is both natural and incredibly effective. TR6 represents the future of hair regrowth technology.”

TR6 is designed for individuals seeking visible hair thickening results without drugs and without compromising on safety or relying on synthetic chemicals. The formulary works with the body’s natural processes, delivering safe and measurable results. TR6 represents a new frontier for the hair regrowth industry, combining advanced research with real-world results.

TR6 is now available for consumers and signals an important milestone in the fight against hair loss. It is available by injectable treatments through [AlviArmani surgical centers globally](#) and in a topical treatment foam through [Origenere International's](#) Sempre Line of Products.

ABOUT ALVIARMANI RESEARCH INSTITUTE

AlviArmani Research Institute has been at the forefront of hair research for over two decades. Committed to innovation and excellence, the Institute combines scientific rigor with a focus on natural, patient-centered solutions. At the center of the Institute is MicroScalp technology. Microscalp technology allows AlviArmani researchers to effectively and efficiently evaluate the effects of various therapies for preserving hair and improving hair growth.
