Sugar-free ice cream is a special type of ice cream made by substituting sugar with sugar alcohol. Sugar alcohols are compounds derived from sugar, which resemble sugar in terms of both taste and appearance but contains fewer calories. Xylitol, erythritol, sorbitol, and maltitol are few popular sugar alcohols that may be used to make sugar-free ice cream.

People perceive sugar-free ice cream as a healthier alternative to regular ice creams, due to fewer calories and fewer negative health effects. This is a key factor propelling the growth of the sugar-free ice cream market globally. Moreover, increase in prevalence of diabetes, obesity, and heart disease is boosting the demand for sugar-free ice cream. Around 1.5 million deaths were recorded across the globe that were directly associated with diabetes. Therefore, increase in health consciousness, rise in trend of living an active & healthy lifestyle, and surge in demand for healthy food coupled with high disposable income act as the key driving forces of the global sugar-free ice cream market.
