*The Business Research Company's
Climate Change Consulting Global Market
Report 2025 – Market Size, Trends, And
Global Forecast 2025-2034*

LONDON, GREATER LONDON, UNITED
KINGDOM, February 14, 2025
/EINPresswire.com/ -- What is the
projected growth for the climate
change consulting market?

The [climate change consulting market size](#) has grown strongly in recent years. It experienced robust growth from \$7.89 billion in 2024 to an estimated \$8.55 billion in 2025, reflecting a compound annual growth rate CAGR of 8.4%. This substantial growth in the historic period can be attributed to increasing regulatory pressures, rising public awareness of environmental issues, growing corporate sustainability commitments, international climate agreements, and significant weather-related events.

What is driving the growth of the climate change consulting market?

The continued rise in greenhouse gas emissions is expected to be a key factor propelling the growth of the climate change consulting market going forward. Greenhouse gas emissions, gasses emitted into the atmosphere that capture heat, contribute to the greenhouse effect, which leads to global warming and climate change. The constant increase in these emissions is driven by amplified fossil fuel consumption, industrial activities, deforestation, and the growth of transportation and agriculture sectors. Furthermore, factors such as urbanization and economic development contribute to higher energy use and emissions.

Who Are The Key Players In The climate change consulting Market?

Climate change consulting plays a crucial role in assisting businesses to discover and adopt methods to lower greenhouse gas emissions. These strategies include enhancing energy efficiency, adopting sustainable practices, and engaging in carbon offset projects, all of which collectively aid in combating climate change. As an example of its impact, in July 2024, according to the Environmental Protection Agency EPA, a US-based government agency, greenhouse gas emissions in the U.S. rose by 0.2% in 2022 compared to the levels in 2021.
