

Top Growth Driver In The Dental Infection Control Market 2025: Ising Oral Disease Incidence To Drive Growth In Market

The Business Research Company's Dental Infection Global Market Report 2025 – Market Size, Trends, And Global Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, February 14, 2025
/EINPresswire.com/ -- Is the [dental infection control Market](#) Set to Witness Substantial Growth?

The [dental infection control market size](#) has made significant strides in recent years, and it shows signs of continuing this trend. In 2024, the market was worth \$1.28 billion; by 2025, it is projected to increase to \$1.38 billion, reflecting a robust compound annual growth rate CAGR of 7.7%. The surge can be attributed to increased awareness about infection prevention, escalating prevalence of dental procedures, tightening regulatory standards, the rise in infectious diseases, and expansion in dental healthcare infrastructure.

What will drive this market forward in the forecast period?

One significant factor is the growing number of patients with oral diseases. Oral diseases affect various structures in the mouth, including the teeth and gums, and can cause discomfort, impair oral function, and lead to systemic health complications. The swell in patients suffering from oral diseases is fuelled by poor oral hygiene, unhealthy sugar-laden diets, tobacco usage, alcohol consumption, aging populations, and limited access to preventive dental care.

This growing patient population propels the need for dental infection control products, which are critical in preventing cross-contamination during the treatment of oral diseases. For instance, in January 2024, a report by the American Cancer Society estimated that 58,450 adults in the United States would be diagnosed with oral or oropharyngeal cancer compared to 54,000 adults in 2022.
