How are Cardiovascular Diseases Driving the Rehabilitation Market?

Cardiovascular diseases CVDs, being a group of disorders affecting the heart and blood vessels, acts as a vital propellant for the upward trend of the cardiac rehabilitation market. The surge in cardiovascular diseases can be attributed to unhealthy dietary habits, physical inactivity, tobacco use among others. Moreover, circumstances like higher alcohol intake, air pollution, socioeconomic factors like poverty and stress also put the heart at risk. This intervention focuses on regular physical activity to improve circulation, augment overall cardiovascular function and,
