

Rich Bulger Joins Tallgrass Solutions as Fractional Chief Circularity Officer

CA, UNITED STATES, February 18, 2025

/EINPresswire.com/ -- [Tallgrass](https://tallgrass.com)

Solutions, a leader in innovative AI-driven sustainability and lifecycle management, proudly announces the addition of Rich Bulger as its Fractional Chief Circularity Officer (CCO). Rich's unparalleled expertise in reverse logistics and the circular economy will strengthen Tallgrass's mission to deliver transformative solutions through its revolutionary Revlogix Tech Stack.

Rich continues his work with Recycle Global Exchange (RGX) and Capital Growth Partners, leveraging his network and expertise to drive meaningful change in sustainability and circular logistics.

Accelerating Circular Supply Chains with AI and Machine Learning

“

Rich's ability to connect industry-leading practices with our cutting-edge technology is a game-changer. We're providing more than actionable tools for financial and operational excellence.”

Michael Beale

Artificial intelligence (AI) and machine learning (ML) are revolutionizing the optimization of circular supply chains. Tallgrass.ai leverages these advanced technologies to analyze complex information from multiple sources and enable real-time decision-making through its Alert, Prescribe, and Comply methodology. By transforming monthly snapshots into dynamic, real-time tools, Tallgrass empowers companies to:

Save tens of millions of dollars in part usage, labor, and logistics.

Maximize the residual value of products.

Deliver best-in-class customer service.

The integration of artificial agents and threshold-based decision-making ensures businesses achieve both environmental sustainability and economic efficiency.

Rich's operational knowledge and market intelligence bring a critical edge to Tallgrass's ability to supercharge how information systems are transforming reverse logistics. With his leadership, clients will benefit from actionable insights that deliver measurable results.

A New Frontier: The Fractional Chief Circularity Officer Role

The title of Fractional Chief Circularity Officer is newly emerging and gaining traction as companies increasingly recognize the convergence of sustainability responsibilities with the economic benefits of the circular economy. This role reflects a strategic blend of environmental stewardship and financial performance, making it a cornerstone for organizations looking to thrive in today's rapidly evolving marketplace.

Diving Deep into Circular Finance with Key Technology Manufacturing Clients

Tallgrass Solutions recently conducted a Going Circular Master Class with key technology manufacturing clients, focusing on the intricacies of Circular Finance modules. Hosted at a premier client site, the session featured thoughtful participation from industry leaders and included insightful pre-interviews led by Tallgrass's experts.

Rich extended his gratitude to his collaborators at Tallgrass Solutions, Michael Beale and Ralph Sijl, for their dynamic expertise and partnership in making the session a success.

"This session exemplified the power of collaboration and innovation," said Bulger. "I'm grateful to our clients and my colleagues at Tallgrass for their shared commitment to exploring transformative strategies for circular logistics and finance."

Revlogix: Powered by the Evaluation Engine Module

As part of his role with Tallgrass, Rich will focus on integrating circularity principles into Revlogix, a proprietary AI-driven solution designed to optimize product lifecycle management. A key component of the Product Passport within Revlogix is the Evaluation Engine module, which conducts ongoing financial assessments of spare parts down to the serial number and part number level.

This advanced module allows businesses to:

Visualize the financial value of re-using spare parts in real-time.

Make data-driven decisions on repairs, refurbishments, and recycling opportunities.

Optimize inventory management and reduce waste, ultimately enhancing sustainability outcomes.

By bridging best practices in circular finance and logistics, Rich will help key clients achieve measurable environmental and economic impacts.

Quote from Michael Beale, Managing Partner at Tallgrass Solutions:

“Rich’s ability to connect industry-leading practices with our cutting-edge technology is a game-changer. With modules like the Evaluation Engine, we’re not just promoting sustainability—we’re providing actionable tools for financial and operational excellence.”

Synergizing Across Partnerships

As a Partner at Capital Growth Partners, Rich continues to drive the Going Circular Consulting mission, helping global organizations navigate transformative strategies for circular finance and logistics. His dual engagement with Tallgrass and RGX highlights a collaborative approach to advancing circular economy goals.
