Granite Dominates Countertop Market with 29.15% Share in 2023, Kitchen and Residential Segments Lead as Demand for Durable, Aesthetic Countertops Grows.

By Material:

The Granite material is dominating the market with a share of around 29.15% in 2023. This dominance is primarily due to the excellent features of it, such as strength, abrasion resistance, exposure to weather, and durability. These properties make granite an excellent material for countertops, capable of enduring daily use without losing its visual attractiveness. Granite also comes in a variety of colors and patterns that enable home owners and designers to choose from a plethora of styles. In addition, having a cost-effective option to last long gives benefit to granite over other materials is an important factor that added a lot to the popularity of this material for residential and even commercial areas.

By Application:

The kitchen segment dominated the industry in 2023, accounting for the largest share of more than 64.18%. This trend is expected to continue through the forecast period. Growth in this segment is mainly attributed to the increasing need for countertops, particularly in kitchens, as customers place greater importance on aesthetics and functionality. The kitchen segment is expanding also as new construction gives way to a higher percentage of residential housing dedicated to kitchen than ever before, as well. With kitchen designs constantly evolving and the introduction of more advanced and durable countertop materials, that segment in particular will probably remain a leading market in the coming years due to the demand for modern kitchen spaces as well as the growing popularity of home renovation projects.

By End User:

The residential user segment is dominating the market, holding a share of around 73.50% in 2023. This trend is fueled by larger modular kitchens and multiple bathrooms in single-family homes. With increasing consumer demand for improved liveability, splurging on home remodeling has surged, fuelling the segment growth. This demand in the market is driven by how people are choosing to create a stronger and beautiful place for themselves to stay in. A continuing trend towards higher end details in homes - especially kitchens and baths are driving the market growth in residential end use.

Asia-Pacific Region Leads Countertop Market with 37.10% Share in 2023, Rising Incomes and Urbanization Drive Market Growth in Key Countries

The Asia-Pacific region dominated the Countertop Market with a share of around 37.10% in 2023. This dominance is primarily driven by rising disposable incomes and an improved standard of living in the region. This has also led to the demand for countertops due to the growing number of residential and commercial buildings owing to the growing population and

urban migration. With increasing need for countertop replacement and home renovation, this region is anticipated to remain at the top. Additionally, the rapid growth of construction, as well as commercial economic activity in nations such as China, India, and Japan, also fuels regional growth. This rising demand of both residential and commercial counters underpins growing importance of Asia-Pacific region in global countertop market.
