Is the [folate Market](#) Set to Witness Substantial Growth?

“

The folate market size is expected to see strong growth in the next few years. It will grow to \$3.74 billion in 2029 at a compound annual growth rate (CAGR) of 8.4%.”

*The Business Research
Company*

The folate market has been experiencing robust growth in recent years, expanding from a \$2.49 billion industry in 2024 to an anticipated \$2.71 billion in 2025, reflecting a compound annual growth rate CAGR of 8.8%. The historic growth has been propelled by increasing awareness of the myriad health benefits of folate, including its role in preventing birth defects and supporting overall wellness. This awareness coupled with the growth in consumption of fortified foods, dietary supplements enriched with folate, and a rising prevalence of conditions such as neural tube defects and anemia related to folate deficiency, have all contributed to the market surge. Additionally, a

combination of health initiatives promoting folate supplementation among pregnant women and ongoing research and clinical studies have further fueled this growth.

In the coming years, the folate market size is expected to see continued strong growth. By 2029, it is forecasted to reach \$3.74 billion with a CAGR of 8.4%. This anticipated growth is primarily linked to preventive healthcare measures, notably the increasing demand for fortified foods and dietary supplements, escalating prevalence of chronic diseases where folate can play a pivotal

role, as well as the growing recognition of folate's significance in mental health and cognitive function. Additionally, the expanding applications of folate in personalized nutrition and specifically tailored health solutions are also set to drive growth.

What Drives The [folate Market Growth](#)?

Notably, the demand for nutritional supplements has been a primary driver of the folate market. As consumers become progressively health-conscious, there is a growing demand for dietary supplements, especially those containing essential vitamins like folate. Folate's critical role in preventing birth defects, supporting cell function, and mitigating the risks of chronic diseases make it an integral ingredient in prenatal vitamins and other health products. For instance, Armor Proteines, a France-based nutritional and functional dairy ingredients manufacturer, reported that in 2022, France's nutritional supplement revenue reached \$2.87 billion, marking a 3% increase compared to 2021.
