

HD Life Preserver: Immediate, Secure, Encrypted Medical and Emergency Information in a 2D Code.

Voluntary Life-Saving and Contact Information Stays only with the Individual. HD Life Preserver Code is a New Level of Security without violating HIPAA.

INDIALANTIC, FL, UNITED STATES, February 20, 2025 /EINPresswire.com/ -- HD Barcode LLC introduces the [HD Life Preserver](#), an innovative solution designed to provide critical personal and medical information securely in emergencies. This cutting-edge technology ensures first responders can access life-saving details quickly, making it an essential tool for personal safety.

What is the HD Life Preserver? The HD Life Preserver Code is a secure, encrypted system that allows individuals to store vital information without concerns about online data breaches. Available in Q3 2025, users can visit the HD Life Preserver website, enter their details, and receive three water-resistant labels in the mail. These labels can be placed on a driver's license, refrigerator, or any easily accessible location for quick identification.

How It Works: In an emergency, first

HD Life Preserver

Immediate Emergency Access to Critical Information Contacts are Immediately Texted!

Step 1: Scan QR Code to Access Life Preserver Service

Emergency Contact	
Name, Address, Phone Number, & Relationship	Gary Parish 321-952-2490
Name, Address, Phone Number, & Relationship	Tedd Baker 321-952-2475

HD Life Preserver Code Creation Workflow

HD Life Preserver Label

responders scan the QR code on the label, directing them to a secure website. Simultaneously, their phone captures the HD Life Preserver Code, which triggers an automatic text message to the individual's pre-listed emergency contacts, alerting them instantly. If a participating local police or fire department is included in the system, one of the provided emergency contacts can reach them directly, allowing for immediate coordination and response. This feature ensures critical information is delivered without delay—time that could determine the outcome of an emergency.

Privacy and Security: Unlike other emergency identification systems, the HD Life Preserver Code does not store personal data online. Instead, all voluntarily entered information remains encrypted within the code itself, eliminating privacy concerns and ensuring compliance with HIPAA regulations. No additional apps are required, and only those with authorization can decode the stored data.

Why Choose the HD Life Preserver? The HD Life Preserver Code is a smart solution for emergency preparedness. Whether at home or on the road, it ensures first responders have access to crucial details when every second counts. The ability to store emergency contact information and medical details in a secure format provides peace of mind to users and their families.

Availability and Additional Information: The HD Life Preserver app version is available now, and the web based version is set for release in the beginning of the third quarter of 2025. For more details on this life-saving technology, visit our website or contact our USA office.

Safe. Simple. Ready when you need it.
