

Reinsurance Market Soars: Expected to Reach \$1,344.3 Billion by 2031 with a 10.8% CAGR

Reinsurance Market Soars: Expected to Reach \$1,344.3 Billion by 2031 with a 10.8% CAGR

NEW CASTLE, DE, UNITED STATES, February 14, 2025 /EINPresswire.com/ -- The global [reinsurance market](#) was valued at \$498.7 billion in 2021, and is projected to reach \$1344.3 billion by 2031, growing at a CAGR of 10.8% from 2022 to 2031.

Major Determinants of the Reinsurance Market Growth

Rise in demand for various insurance plans and increased awareness due to Covid-19 pandemic drive the growth of the global reinsurance market. Moreover, demand for artificial intelligence in reinsurance and conduit reinsurance would open new opportunities in the future.

Covid-19 Scenario:

The pandemic had a negative effect on the market as socioeconomic disruptions accelerated the dynamics of broker, primary insurer, and reinsurer consolidation.

However, the digitization of reinsurance market limited the negative impact of Covid-19 on the market.

The Treaty Reinsurance segment to Manifest the highest CAGR through 2031

By type, the treaty reinsurance segment is estimated to portray the highest CAGR of 11.9% during the forecast period. In addition, the segment held the largest share in 2021, accounting for more than two-thirds of the global reinsurance market, and is expected to continue its dominance throughout the forecast period. The lack of individual underwriting on the part of the assuming insurer is the main feature of a treaty arrangement. The report includes analysis of the facultative reinsurance segment.

The Property & Casualty Reinsurance Segment Dominated the Market

By application, the property & casualty reinsurance segment held the largest share in 2021, contributing to nearly two-thirds of the global reinsurance market, and is expected to maintain

leading position during the forecast period. Commercial property & casualty reinsurance either pays to repair or rebuild property with materials of the same or pays the current value of the damaged property. Hence, this is a major factor driving the growth of the market. However, the life & health reinsurance segment is projected to manifest the highest CAGR of 12.8% during the forecast period, owing to increase in demand for life and health insurance during the forecast period. The COVID-19 pandemic has increased awareness of the value of and demand for life insurance among consumers.

The Broker Segment to Showcase the Highest CAGR through 2031

By distribution channel, the broker segment is projected to manifest the highest CAGR of 13.0% during the forecast period. Brokers use their marketing skills and knowledge about reinsurance to sell policies to the end customers. These intermediaries search for potential buyers and explain the advantages, benefits, disadvantages, and other details for reinsurance coverage, which fuels the growth of the market. However, the direct writing segment held the largest share in 2021, accounting for nearly three-fourths of the global reinsurance market, and is expected to continue its dominance from 2022 to 2031. This is due to awareness among the insurers regarding reinsurance policies to cover business risks and losses.

North America held the Lion's Share

By region, the global reinsurance market across North America held the largest share in 2021, accounting for more than two-fifths of the market. This is due to surge in the life & health insurance, property & casualty insurance, and other insurance policies and advent of increase in demand for artificial intelligence and technologies. However, the market across Asia-Pacific is expected to register the highest CAGR of 14.2% during the forecast period, owing to developing market, underwriting procedures, and innovations across the region.
