Learning Management Systems (LMS) Market Set to Surpass $81,223.80 million by 2030, Register at a CAGR of 20.5%

Rise in adoption for online learning and online classes to lower down costs drive the growth of the global learning management systems market.

LEARNING MANAGEMENT SYSTEMS Market
OPPORTUNITY ANALYSIS AND INDUSTRY FORECASTS, 2021-2030

Learning Management Systems Market is garner to reach **$81.22 Billion** by 2030.

CAGR of 20.5% during the forecast period

Learning Management Systems (LMS) Market

WILMINGTON, NEW CASTLE, DE, UNITED STATES, February 17, 2025 /EINPresswire.com/ -- The global लर्निंग मैनेजमेंट सिस्टम (एलएमएस) मार्केट साइज was valued at $12,793.52 million in 2020, and is projected to reach $81,223.80 million by 2030, growing at a CAGR of 20.5% from 2021 to 2030. Access to high-speed internet and increase in use of learning management systems among educational universities drive the global learning management systems market size. Furthermore, rise in penetration of smartphones and laptops across the globe and development of the digital education industry globally are the major factors that drive the growth of the market. However, poor internet connectivity in remote areas hampers the growth of the market. Moreover, the adoption of learning management systems from students to pursue the educational degrees is one of the major growth factors of the LMS market.

The research offers an extensive analysis of changing market trends, major segments, key winning strategies, and competitive landscape. Surge in digitized education, increase in demand for customized learning and focus on cloud deployment model drive the market growth. However, lack of IT infrastructure in underdeveloped countries restrains the market growth. On the other hand, rise in usage of internet of things (IoT) present new opportunities in the industry.

By deployment mode, the cloud segment acquired major share. Increase in mobile population and distributed workforce encourages the demand for e-learning or online training in the academic and corporate sector. Further, the benefits of cost and accessibility, and increasing technological advancements in learning platforms have encouraged the users to upgrade their traditional LMS to a more contemporary LMS. This has resulted in the growth of the learning management systems market during the forecasted period.

The demand for learning management systems has increased considerably during the COVID-19 pandemic. This is attributed to increase in accessibility towards learning management among consumers and initiatives by governing bodies across the globe to curb the spread of virus by initiating online educations and exams. Moreover, learning management systems method is expected to be intact by economic downturn, and is anticipated to remain high during forecast period. Thus, these factors promote the growth of the learning management systems industry

during the pandemic situation.

Furthermore, the global learning management systems market is in its developing phase, and exhibits high growth potential, due to rise in need for educational platforms among students, especially during the COVID-19 pandemic. For instance, Blackboard, Inc., an American educational technology company announced that it will introduce Blackboard Reach, a new solution for K-12 institutions, in October 2020. The goal of the solution is to make it easier for parents to engage with instructors and have meaningful, in-person conversations. In addition, as several institutions were closed to maintain social distancing, schools and universities shifted their focus towards online coaching and adopted systems, which promote potential of the learning management systems market.
