

AAAC Wildlife Removal of Nashville Welcomes New Owners Jim and Dawn Adams: Dedicated to Wildlife Pest Control Solutions

New owners bring years of field experience and a commitment to safe, humane wildlife control for Nashville homes and businesses.

NASHVILLE, TN, UNITED STATES, April 30, 2025 /EINPresswire.com/ -- [AAAC Wildlife Removal of Nashville](#) is delighted to announce a new chapter under the ownership of Jim and Dawn Adams, effective immediately. The couple is thrilled to continue the legacy of providing humane and professional wildlife control services to the Nashville community.

Jim brings over 21 years of experience as a Paramedic, Firefighter, and Surgical Assistant. His extensive background in these fields has instilled a strong work ethic and a sincere dedication to helping others. Originally from Illinois, Jim developed a passion for animals and nature during his volunteer work with wildlife control operators, coupled with his love for the outdoors. For him, wildlife removal is not just a job, but a calling that combines his commitment to conservation with his love for nature.

Jim and Dawn began their journey in [nuisance wildlife management](#) after relocating to Mobile, AL in 2016, turning their passion into a

family-driven business. Fully licensed by the Tennessee Wildlife Resources Agency and insured to handle both residential and commercial work, AAAC Wildlife Removal of Nashville promises to deliver top-notch service and ensure peace of mind for local property owners.

"We're truly excited to take the helm of AAAC Wildlife Removal of Nashville," said Jim Adams. "Our goal is to provide effective wildlife management while

ensuring the safety and satisfaction of our customers. We understand the challenges that come with unwanted wildlife, and we're here to offer solutions that protect both families and the animals involved. We handle every wildlife problem in the Nashville area, from dead animal removal to snake pests, skunk problems, raccoon infestations, squirrels in the attic, and more!"

Wildlife outside your home

Raccoon Removal in Nashville, TN: Jim's Expert Animal Removal Advice

Raccoons are a common nuisance in Nashville, often finding refuge in attics and crawl spaces. "Raccoons can cause significant damage to insulation, wiring, and vents. They pose risks like rabies and leptospirosis," explained Jim. "Our approach at AAAC Wildlife Removal focuses on humane trapping techniques and thorough inspections to identify entry points. After removal, we repair any damage to prevent future invasions."

If raccoons are becoming a nuisance, rely on the expertise of our licensed and insured specialists to handle the situation efficiently while ensuring your family's safety.

Bat Removal in Nashville, TN: Comprehensive Advice from Jim

Bats play a crucial role in our ecosystem by controlling insect populations, but their presence in our homes can lead to significant issues.

Signs of a Bat Infestation: What to look for during inspection

Recognizing a bat infestation early can help mitigate potential damage and health risks.

"Common signs of an infestation include the presence of droppings around entry points or in attics, unusual noises such as chirping or fluttering during dusk and dawn, and sightings of bats entering or exiting eaves and vents," Jim explains. Additionally, you might notice a strong ammonia-like odor caused by bat guano accumulation.

How Bats Enter Homes

Bats are adept at finding openings to establish their roosts within buildings. "They can squeeze through tiny gaps as small as half an inch," Jim notes. Typical entry points include gaps in roofing materials, eaves, vents, chimneys, and spaces around windows or doors. Structural vulnerabilities make homes particularly attractive to these nocturnal creatures seeking shelter.

Bat Remediation: Nuisance Wildlife Removal Strategies

Effective bat removal requires a strategic approach that prioritizes human and animal safety. Here's how Jim and his team handle bat infestations:

Thorough Inspection: "Our process begins with a comprehensive inspection to identify active entry points and assess the extent of the roost," says Jim. This informs the strategy for humane exclusion and subsequent sealing of these entryways.

Humane Exclusion Techniques: "Exclusion is key to successful bat removal," Jim emphasizes. The team uses one-way exclusion devices that allow bats to exit but not re-enter the building. This method is implemented during specific seasons when bats are not caring for young to prevent leaving pups trapped inside.

Sealing Entry Points: After ensuring all bats have safely vacated the premises, Jim's team seals all potential entry points with durable materials to prevent future infestations. This step is crucial in providing a long-term solution.

Attic Restoration Services: Following removal, AAAC Wildlife Removal offers attic restoration to clean and repair damage, including guano removal and insulation replacement. "This ensures not only safety but also restores your property's condition," Jim adds.

Monitoring and Follow-up: "We advise homeowners on preventative measures and continue to monitor the situation," Jim concludes. Education on maintaining secure and less attractive properties for bats is part of their comprehensive service.

Squirrel Removal in Nashville, TN: Tips from Jim

Squirrels, a familiar sight in Nashville, can become pests when indoors. "Squirrels are crafty and can chew through wiring, wood, and insulation, causing significant structural damage," Jim advised. "Our process involves a comprehensive inspection to locate nesting sites and seal entry points, followed by humane trapping and exclusion."

Jim and Dawn's team ensures that your home stays critter-free, preventing squirrels from disrupting peace of mind with their effective wildlife control methods.
