MO, UNITED STATES, February 18, 2025 /EINPresswire.com/ -- [LDN Research Trust](https://www.linkedin.com/company/ldn-research-trust/) is excited to announce advanced in-person screenings of the documentary 'Understanding [Stealth Syndromes](#)' on Thursday, February 27, 2025 in St Louis, Missouri.

The film aims to shed light on the often-overlooked conditions of Mast Cell Activation Syndrome (MCAS), Hypermobile Ehlers-Danlos Syndrome (hEDS), and Postural Orthostatic Tachycardia Syndrome (POTS), collectively referred to as 'Stealth Syndromes'.

"Up to one in six people in the Northern Hemisphere has one or more of these syndromes, yet it is rare that doctors know about these syndromes, or have the simple skills required to diagnose them," states Leonard Weinstock, MD, lead mast cell researcher.

The event seeks to raise awareness, promote physician education, and ultimately improve the quality of life for countless individuals affected by these multi-systemic disorders.

Q&As with Dr Leonard Weinstock

Attendees will gain valuable insights into these interlinked conditions, which are frequently

misdiagnosed or overlooked in medical practice. The documentary explores their causes, symptoms, why most doctors miss it, treatments, and the challenges faced by those affected.

The screening will be followed by a live Q&A with Dr Leonard Weinstock, providing an opportunity for attendees to engage in meaningful discussions and deepen their understanding of these conditions.
