

Funding the Future: IFortis Worldwide's Mission 20,000 Propreneurs is Bridging the Green Financing Gap for Entrepreneurs

Closing the Green Financing Gap: IFortis Worldwide's Mission 20,000 Propreneurs and WPAF Paving the Way for Sustainable Impact in Emerging Markets

NEW DELHI, INDIA, February 18, 2025 /EINPresswire.com/ -- The challenge of financing green businesses in emerging markets is one of the biggest obstacles to global sustainability. Despite the growing urgency of addressing environmental challenges such as climate change, resource depletion, and biodiversity loss, green small and medium enterprises (SMEs)—especially in developing regions—are often unable to access the necessary capital to scale their impact. This significant financing gap has stunted the growth of impactful businesses that can transform industries and communities, slowing down progress towards a more sustainable world.

However, [IFortis Worldwide](#) is leading a revolutionary initiative aimed at overcoming this challenge through its [Mission 20,000 Propreneurs](#) program—the world's first propreneurship transformation program. By actively reshaping the landscape of venture capital, the program is prioritizing the financial empowerment of green entrepreneurs, especially those in underserved markets.

At the heart of this initiative lies the World Propreneurship Alliance Funds (WPAF)—a dedicated financial platform designed to directly address the trillion-dollar financing gap that inhibits the growth of sustainability-led SMEs. WPAF is the world's first financial facility solely focused on empowering eco-friendly, ethical businesses in emerging markets, catalyzing their expansion, and scaling their positive impact.

The need for a program like WPAF is more critical than ever. According to the United Nations, the financing gap for achieving the Sustainable Development Goals (SDGs) stands at a staggering

World's First Propreneurship Transformation Program

\$2.5 trillion annually. This gap severely limits the ability of green SMEs to grow their businesses, making it difficult for them to create lasting change in communities, ecosystems, and industries. WPAF is addressing this challenge head-on by providing the financial solutions and resources green entrepreneurs need to overcome barriers, scale their operations, and contribute to a sustainable future.

The global demand for sustainable solutions is escalating, and the green economy is projected to reach a \$23 trillion valuation by 2030. WPAF is strategically positioned to help green businesses tap into this rapidly growing market. By offering tailored financing to entrepreneurs operating in sectors such as renewable energy, sustainable agriculture, green technology, and eco-friendly manufacturing, WPAF empowers businesses to scale their innovations and reach more consumers while actively contributing to the global fight against climate change and environmental degradation.

One of the most striking aspects of the Mission 20,000 Propreneurs program is its focus on inclusive growth. The initiative places a strong emphasis on empowering women and youth—two groups that are often underrepresented in the entrepreneurial ecosystem. By prioritizing these entrepreneurs, WPAF is ensuring that diverse voices and innovative solutions are central to the green economy's future.

Entrepreneurs in this program gain access to not just capital, but also resources, mentorship and networking opportunities. These resources provide the guidance necessary to thrive in the fast-evolving green economy, building businesses that are not only financially successful but also aligned with the United Nations SDGs, such as climate action, gender equality, and economic inclusivity.

Through its funding and strategic support, WPAF is playing a pivotal role in driving global green transformation. By helping green SMEs scale and expand, the initiative is encouraging entrepreneurs to innovate, develop sustainable technologies, and implement best practices that will ultimately contribute to a low-carbon, sustainable economy.

As businesses grow through the resources provided by WPAF, they are positioned to become market leaders in the green economy. These eco-entrepreneurs are pioneering new methods of sustainable production, consumption, and waste management. They are innovating in industries such as clean energy, eco-tourism, recycling, and sustainable agriculture, paving the way for scalable, impactful solutions to global challenges.

Reflecting on the initiative's impact, Mr. [Rohit Naidu S](#), CEO of IFortis Worldwide, states "At IFortis Worldwide, we recognize the pressing need for a more sustainable future. Our Mission 20,000 Propreneurs program is reshaping the future of entrepreneurship by establishing a new model for sustainable venture capital. The World Propreneurship Alliance Funds (WPAF) are providing the critical capital green SMEs need to grow, expand, and make a tangible difference in the world. We are proud to empower green entrepreneurs with the tools, resources, and mentorship

necessary to scale their businesses and contribute meaningfully to a global green transformation."

Through WPAF, Mission 20,000 Propreneurs is proving that sustainable businesses are not only essential for the planet's future but are also lucrative opportunities that drive job creation, economic growth, and community empowerment in emerging markets.

With a growing global market for sustainability-driven businesses, IFortis Worldwide and WPAF are setting the stage for a new era in green entrepreneurship. By providing targeted financial support to SMEs, especially those led by women and youth, the initiative is ensuring that entrepreneurs have the resources they need to scale and lead the way toward a sustainable future.

Through Mission 20,000 Propreneurs, IFortis Worldwide is creating an ecosystem of change—an ecosystem that brings together innovative entrepreneurs, impact investors, and sustainability leaders in an effort to transform industries, mitigate climate change, and foster equality on a global scale. The program is not only helping businesses grow, but it is helping them do so in a way that benefits the planet, society, and the global economy.
