The ITSM market is segmented on the basis of component, function, deployment mode, enterprise size, end user, and region. On the basis of component, the market is categorized into service management solution and services. On the basis of function, the market is divided into configuration management, performance management, network management, and database management system. By deployment mode, it is divided into on-premise and cloud. On the basis of enterprise size, the market is classified into large enterprise and small & medium-sized enterprise. On the basis of end user, the market is segregated into BFSI, healthcare, retail & e-commerce, IT & telecom, manufacturing, and others. By region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Additionally, the information technology service management market is expected to witness notable growth owing to rising adoption of its infrastructure across the end user industries, surge in digital business transformation, and increasing demand for a unified platform. Moreover, the need for improved it service delivery is expected to provide a lucrative opportunity for the growth of the market during the forecast period. On the contrary, implementation and lack of quality standards in service-level limits the growth of the information technology service management market.

On the basis of function, network management dominated the ITSM market size in 2022, owing

to the increased adoption of software-defined networking (SDN) and network virtualization. These technologies provide greater flexibility, scalability, and agility in managing network resources, aligning with the dynamic needs of organizations. However, the database management system is expected to witness the fastest growth, owing to the emphasis on hybrid and multi-cloud database management, recognizing the diverse IT environments that modern organizations operate in. This trend ensures seamless data integration and accessibility across different platforms.

Region-wise North America dominated the ITSM market share in 2022, owing to the surge in the integration of artificial intelligence (AI) and machine learning (ML) within ITSM frameworks, aimed at automating routine tasks, improving predictive analytics, and enhancing overall service delivery. However, Asia-Pacific is expected to witness the fastest growth in the upcoming year, owing to the organizations leveraging ITSM to navigate through digital transformation by adopting machine learning algorithms and integration of artificial intelligence within digital technologies. Cloud computing is a prevailing trend, offering scalability and flexibility for IT service delivery.

The key players profiled in the ITSM industry analysis are Atlassian, BMC Software, Inc., Broadcom, Cloud Software Group, Inc., Freshworks Inc., Hewlett Packard Enterprise Development LP, IBM Corporation, Ivanti, Inc., Open Text Corporation, and ServiceNow, Inc. These players have adopted various strategies to increase their market penetration and strengthen their position in the ITSM industry.
