

24/7 Security Uganda Expands Product Line with More Innovative Security Solutions

24/7 Trainings and Security Uganda, a leading security solutions provider, is proud to announce the expansion of its product line in Uganda.

UGANDA, February 19, 2025 /EINPresswire.com/ -- 24/7 Trainings and Security Uganda, a leading security solutions provider, is proud to announce the expansion of its product line in Uganda. The company, launched in Uganda in early 2024, is part of the 24/7 Security Group of Companies, a global security firm headquartered in the United Kingdom with a presence in Rwanda and ongoing expansion across East Africa. The company is proud to introduce new cutting-edge security solutions to the East African market. These are the 24/7 Portable Site Security Tower and AI-enabled CCTV cameras. These new products will enhance its existing offerings, which include private security guards, K9 security, and remote CCTV monitoring.

The 24/7 Portable Site Security Tower is designed to provide reliable, all-weather surveillance for construction sites, industrial projects, and remote locations. Equipped with high-definition cameras, the tower ensures comprehensive coverage while its solar-powered operation guarantees functionality even in off-grid areas. Security teams can remotely monitor live feeds and receive real-time alerts in case of suspicious activity, reducing reliance on traditional on-site security personnel. Its tamper-proof design and ease of deployment make it an effective solution for large-scale security needs.

“

We take pride in providing affordable, high-tech security solutions tailored to the needs of businesses, individuals, and government institutions.”

Mr. Sammuell Kitone

Alongside the tower, the introduction of AI-enabled CCTV cameras marks a significant advancement in security technology. These cameras feature facial recognition, object detection, and license plate recognition, enhancing access control and surveillance accuracy. With behavioral analysis capabilities, the AI-powered system can detect unusual activities such as loitering or unauthorized access

and trigger instant alerts. Cloud-based storage ensures remote access to footage while integrating seamlessly with existing security infrastructures.

"With over two decades of experience, 24/7 Security Group remains committed to innovation and excellence in the security industry. We take pride in providing affordable, high-tech security solutions tailored to the needs of businesses, individuals, and government institutions. Our goal is to ensure that security challenges are met with state-of-the-art technology and expert services, reinforcing our dedication to safety and reliability." says the founder, Mr Samuel Kitone.
