

Digital Marketing Software Market Poised to Hit \$181.0 Billion by 2030, Growing at 14.1% CAGR

By region, North America generated the highest revenue during the digital marketing software market forecast.

WILMINGTON, NEW CASTLE, DE, UNITED STATES, February 19, 2025 /EINPresswire.com/ -- The global [digital marketing software market](#) was valued at \$48.4 billion in 2020, and is projected to reach \$181.0 billion by 2030, growing at a CAGR of 14.1% from 2021 to 2030. Digital

marketing is the process of marketing products or services to potential customers via digital channels and the internet. Digital marketing has the same goals as traditional marketing, the only difference is the medium used to convey the marketing message. Various digital marketing activities, such as search engine optimization (SEO), social media marketing (SMM), email marketing, search engine marketing (SEM), and content creation are used by businesses to promote their brand to their potential consumers or to retain their customers.

Digital marketing allows businesses to allocate their marketing resources to the right set of people through the right channels. This ensures optimal use of resources and higher conversion rates. Thus, it has become a very integral part of all kinds of businesses in present era. And especially since the COVID-19 pandemic, digital marketing has turned into a necessity. Ideally, it is one of the most effective ways to reach target market while they are stuck at home and spending a lot of time on the internet. Consequently, this has given a boost to the scope of digital marketing careers. To run smoothly, companies need digital marketing professionals and experts, and thus the job market is growing tremendously.

Global Market & Industry Research Report on Digital Marketing Software Market :

<https://www.alliedmarketresearch.com/digital-marketing-software-market/purchase-options>

On the basis of industry vertical, the media & entertainment segment is expected to grow at the fastest rate during the forecast period. This is attributed to the cost-effective advertising which is a major driving force for the global digital marketing software market. It helps in improving the demand and financial forecast for the media & entertainment industry.

Furthermore, the retail & E-commerce segment is forecasted to exhibit fasted growth during the forecast period. This is attributed to the fact that the retail and E-commerce industry is deluged with insights and data points that analyze their audiences and depict ways to connect with them. Various factors such as increase in brand awareness, better connection with audiences, creating hype around products, and reduced gaps in the sales cycle are expected to drive the market in the retail and E-commerce sector.
