What Are The Key Factors Driving The Growth Of The Acute Lung Injury Market?

Growth of the market in the historic period was largely caused by increased public awareness about the disease, rise in ICU admissions, the impact of smoking and air pollution, increase in hospital-acquired infections, and efforts to reduce mortality rates. It is also projected that the [acute lung injury market size](#) will grow to \$3.09 billion

in 2029, at a CAGR of 4.4% in the forecast period.

What Are The Key Trends To Note In This Market Sector?

Key trends in the forecast period include the development of biologic drugs, wearable and remote monitoring devices, therapies based on inhalation, CRISPR and gene editing technologies, and real-time analysis biosensors.

Growth in the forecast period can be attributed to advancements in biologics and gene

What is the role of respiratory diseases in driving the growth of the acute lung injury market?

The escalating prevalence of respiratory diseases is a significant factor propelling the growth of the acute lung injury market. These are conditions that compromise the lungs and other parts of the respiratory system, causing breathing difficulties and impaired lung function. The growing number of respiratory diseases can be attributed to increased air pollution, smoking, sedentary lifestyles, an aging population, and the negative impact of viral infections.

Official data from the Australian Bureau of Statistics in September 2023 indicates a substantial increase in the death rate owing to influenza and pneumonia, from 31.9 per 100,000 people in 2021 to 42.6 per 100,000 people in 2022, representing a rise of approximately 33.54%. Therefore, the growing prevalence of respiratory diseases is driving the growth of the acute lung injury market.

Who Are The Key Players Shaping The Acute Lung Injury Market?

Major firms operating in this market encompass Thermo Fisher Scientific Inc., GlaxoSmithKline plc, Medtronic plc, Baxter International Inc., Ono Pharmaceutical Co Ltd., Aster DM Healthcare, Octapharma AG, Cartesian Therapeutics Inc., Vapotherm Inc., Stemedica Cell Technologies Inc., Implicit Bioscience Ltd., Apeiron Biologics AG, Faron Pharmaceuticals Ltd., Histocell Sociedad Limitada, Vasomune Therapeutics Inc, Windtree Therapeutics Inc., Qx Therapeutics Inc., Asklepiion Pharmaceuticals LLC, ReAlta Life Sciences Inc., MediciNova Inc.

How Is The Acute Lung Injury Market Evolving?

Companies are focusing on developing novel treatments, like peptide treatments, to maintain their market position. A good example is the launch of Aivaptadil by Zuventus Healthcare Ltd., an India-based healthcare firm, for treating acute respiratory distress syndrome ARDS. The treatment has demonstrated clinical efficacy in improving outcomes for patients with severe virus-related ARDS.
