

Ship Loader and Unloader Market to Reach \$57.87 Bn, Globally, by 2030 at 3.6% CAGR

Ship Loader and Unloader Market to Reach \$57.87 Bn, Globally, by 2030 at 3.6% CAGR

NEW CASTLE, DE, UNITED STATES, February 19, 2025 /EINPresswire.com/ -- Allied Market Research published a report, titled, "[Ship Loader and Unloader Market](#) by Product Type (Stationary and Mobile), Bulk Type (Dry, and Liquid), Technology (Mechanical and Pneumatic), and Application (Mining, Machinery, Construction, Sea Ports & Cargo Terminals, and Others): Global Opportunity Analysis and Industry Forecast, 2021–2030." According to the report, the global ship loader and unloader industry generated \$39.77 billion in 2020, and is projected to reach \$57.87 billion by 2030, witnessing a CAGR of 3.6% from 2021 to 2030.

Prime determinants of growth

Rise in demand for cargo transportation through ships, increased need for workplace safety in industrial applications, and focus on renewable energy development drive the growth of the global ship loader and unloader market. However, fluctuation in raw material prices and high operational and equipment costs hinder the market growth. On the other hand, increase in demand for prefabricated construction and automation in ship loaders and unloaders create new opportunities in the coming years.

The stationary segment to continue its lead position during the forecast period

Based on product type, the stationary segment accounted for the highest share in 2020, contributing to nearly two-thirds of the global ship loader and unloader market, and is projected to continue its lead position during the forecast period. This is due to its features such as bulk material handling capacity, high flexible loading booms, post-Panamax vessels, and cost-effective design. However, the mobile segment is expected to manifest the highest CAGR of 4.0% from 2021 to 2030, owing to features such as high efficiency and remote accessibility and increase in adoption in various industries such as mining, packaging, and seaports sectors.

The mining segment to maintain its dominant share in terms of revenue during the forecast period

Based on application, the mining segment [held the highest share in 2020](#), accounting for nearly

one-third of the global ship loader and unloader market, and is estimated to maintain its dominant share in terms of revenue during the forecast period. This is due to heavy lifting capacity of loaders and unloaders and ability to configure as per the requirements and applications. However, the seaports and cargo terminals segment is projected to portray the fastest CAGR of 4.1% from 2021 to 2030. This is attributed to efficient cargo handling and application in ship and component manufacturing.

Asia-Pacific, followed by Europe and North America, to maintain its leadership status during the forecast period

Based on region, Asia-Pacific, followed by Europe and North America, contributed to the highest market share in 2020, holding more than one-third of the global ship loader and unloader market, and is expected to maintain its leadership status during the forecast period. Moreover, this segment is estimated to witness the highest CAGR of 4.3% during the forecast period. This is due to rapid infrastructural development and shift in ship production in Asian countries for abundance of human workforce and low land prices.

Leading Market Players

FLSmidth A/S
Fluor Corporation (American Equipment Company Inc.)
Buhler Group
Sandvik AB
Vigan Engineering S/A
NEUERO Industrietechnik für Förderanlagen GmbH
SMB International GmbH
Aumund Group
EMS-Tech Inc.
Liebherr-International AG
