Express delivery is the fastest form of shipping that involves the delivery of various goods and products through different mediums such as air, water, and land. The customer pays an extra shipping cost for this type of delivery as the shipment will get transported to him anywhere between 24 to 72 hours depending on the distance of the shipment. In express shipping, the price and rates are also higher than other forms of transportation.

Express delivery services significantly operate on the business-to-business (B2B), business-to-customer (B2C), and customer-to-customer (C2C) models. These include personal and business items such as letters, documents, merchandise, consumer goods, and other non-palletized goods. Several express delivery service providers also offer value-added services such as packaging, labeling, billing, payment collection, return, and exchange.

[The growth of value-added services in express delivery](#) is one of the latest trends that will contribute to the growth of the market in Vietnam. Service providers in the express delivery services market in Vietnam are increasingly focusing on providing distinct types of services, such as grading & assortment of products, packaging, labeling, online tracking of parcels, mobile

applications, e-mail, and SMS alerts.
