Research Methodology

Market Research Methodology of Knowledge Management Software: The market research methodology for airport PRM (Passengers with Reduced Mobility) assistance systems involves a comprehensive approach to analysing market trends, customer preferences, and competitive landscape. The methodology typically begins with secondary research to gather data on airport infrastructure, regulations, and existing PRM assistance systems. Primary research is then conducted through interviews, surveys, and observational studies with airport authorities, airline

operators, PRM service providers, and passengers with reduced mobility to understand their needs, challenges, and preferences regarding PRM assistance services. Data analysis techniques such as market segmentation, trend analysis, and competitive benchmarking are employed to identify market opportunities, assess customer requirements, and develop tailored solutions. Additionally, stakeholder engagement and collaboration are key components of the research methodology to ensure the relevance and feasibility of PRM assistance systems in airport environments.
