

Sydney Based Positive Vibes Electrical In Demand For Replacement Of Old Switchboards

In an interview with Metro Cities Media, Positives Vibe Electrical Services confirmed that demand in Sydney for replacing old switchboards is strong and growing

SYDNEY, NSW, AUSTRALIA, February 22, 2025 /EINPresswire.com/ -- The

switchboard is one of the most crucial pieces of equipment in any home, business or industrial building. It coordinates the supply of electricity to

the entire structure and ensures that everything functions as it should. However, if a switchboard catches fire, it might seriously harm the structure and endanger everyone inside.

[Drew Sussmann](#) owner of [Positives Vibe Electrical Services](#) said this when interviewed by [Metro Cities Media](#) ,“A switchboard fire may be brought on by faulty wiring, overloaded circuits, or even mice gnawing on the insulation around the wires. Switchboard fires are not unusual, and they may cause significant or total damage to the property. We have seen an encouraging number of requests of late by home and business owners wanting to replace old switch boards. Media publicity has also assisted the public's awareness.”

The dangers of switch board fires and how to prevent them should be known to every home and business owner. It cannot be emphasised enough that electrical faults can result in the switchboard catching fire, which can be deadly for occupants. They may even destroy the home or business premises.

The National Fire Protection Association estimates that in America 51,000 residential fires annually are caused by electrical failure or malfunction, result in 470 fatalities, 1,400 injuries, and \$1.3 billion in property damage. Switchboard fires are especially risky due to the high voltage of electricity passing through them, while every fire has the potential to be harmful. Switchboard fires are extremely challenging to extinguish since live wires are frequently involved in them.

Positive Vibes Electrical Services

About Positives Vibe Electrical Services

The team at Positives Vibe Electrical Services can handle any electrical task. Whether renovating the aging family home or have an urgent electrical emergency, they have the expertise, equipment and know how to produce the solution quickly.
