

Bright Start Ed-Tech Launches Crowdfunding Campaign with Funding Hope to Personalize Learning Through AI

Bright Start is on a mission to revolutionize education through AI-powered technology, a personalized learning experience that adapts to each student

LOS ANGELES, CA, UNITED STATES, March 6, 2025 /EINPresswire.com/ -- Bright Start Ed-Tech Inc., founded by Professor Gary Surdam, is thrilled to announce the launch of its crowdfunding campaign in partnership with Funding Hope. Bright Start is on a mission to revolutionize education through AI-powered technology, creating a personalized learning experience that adapts to each student's unique needs.

Traditional education often relies on a “one-size-fits-all” approach, but Bright Start Ed-Tech is changing that. By leveraging data from schools, teachers, and education programs, Bright Start’s innovative mobile platform delivers customized lessons, improving academic success and addressing diverse learning needs.

“

Bright Start Ed-Tech is creating an AI-powered mobile app that customizes lessons for each student, moving away from the outdated “one-size-fits-all” approach—helping kids learn smarter, not harder.”

Gary Surdm, CEO

“Our goal is to ensure that every student receives the personalized instruction they deserve,” said Professor Surdam. “This campaign will allow us to accelerate the development of our AI-driven platform, making a meaningful impact on education.”

A key part of this initiative is Bright Start’s collaboration with a talented team of university interns led by Director of

Technology Sam Leung. This program not only fosters innovation but also provides invaluable mentorship and hands-on experience for students in the field.

Supporters can learn more and contribute to Bright Start's vision by visiting the crowdfunding campaign page:
