Growth in awareness among end-users regarding the benefits of agrochemicals, conservation of genetic material of endangered plant species, and rise in R&D activities drive the growth of the global specialty chemicals market. However, fluctuating cost of raw materials and stringent regulations governing the market hinder the market

growth. On the other hand, increase in demand for specialty chemicals from emerging economies and continuous development and production of novel eco-friendly specialty chemicals create new opportunities in the coming years.

Based on type, the pharmaceutical ingredients segment contributed to the largest share in 2019, accounting for nearly one-fifth of the total share, and is estimated to maintain its dominant position during the forecast period. However, the oil field chemicals segment is expected to register the highest CAGR of 5.7% from 2020 to 2027.

The global specialty chemicals market is segmented on the basis of type and region. Depending on type, the market is divided into agrochemicals, flavor ingredients, fragrances ingredients, dyes & pigments, personal care active ingredients, water treatment chemicals, construction chemicals, surfactants, textile chemicals, bio-based chemicals, polymer additives, oil field chemicals, paper & pulp chemicals, electronic chemicals, specialty polymers, pharmaceutical ingredients, and others. Region wise, the specialty chemicals market is analyzed across North America, Europe,

Asia-Pacific, and LAMEA.
