- Absorb Software – Absorb LMS

- G-Cube – G-Cube LMS

By Learning Type: Distance Learning Dominates, Instructor-led Training Registers Fastest Growth

The distance learning segment dominated the market and held the largest market share in 2023 because self-paced online courses are the most flexible, effective, and economical. The ease with which it can be accessed through cloud-based learning platforms and the abundance of microlearning modules have played a huge role in its proliferation.

The Instructor-Led training segment is projected to gain the fastest CAGR owing to the rising demand for blended learning models that incorporate both digital and face-to-face interactions to create more engaging and personalized training experiences.

By Organization Size: Large Enterprises Lead, SMEs Register Fastest Growth

The large enterprises dominated the market and accounted for a significant revenue share in 2023, With massive budget spending for workforce training and compliance-related learning programs. These organizations are combining AI and analytics-based e-learning solutions to maximize employee productivity.

The SMEs are expected to register the fastest CAGR during the forecast period, as the market for cost-effective digital training solutions is growing, and subscription-based learning solutions are available in the market designed to meet the learning needs of smaller teams.

By Vertical: IT Sector Leads, BFSI Registers Fastest Growth

The IT segment dominated the market and accounted for a significant revenue share in 2023, with the IT sector requiring employees to acquire skills needed for new technology, including AI, cybersecurity, and cloud computing.

The BFSI sector is estimated to be the fastest-growing sector. Driven by the demand for compliance training, risk management courses, and digital finance skills enhancement programs.

By Region: North America Leads, Asia-Pacific Registers Fastest Growth

North America dominated the market and held the largest market for corporate e-learning due to the number of top e-learning providers present in the region, increased corporate training spending, and significant adoption of digital learning platforms in the region. Also, based on the present state of affairs,

The Asia-Pacific is expected to register the fastest CAGR during the forecast period, driven by strong internet penetration, enhanced investment fundraising in upskilling the workforce, and government efforts to boost digital-based education in India and China.
