- Microsoft (Microsoft Teams for Education, Microsoft OneNote Class Notebook)
- Udacity, Inc. (Udacity Nanodegree Programs, Udacity for Enterprise)
- upGrad Education Private Limited (upGrad Online Programs, upGrad for Business)

By Sector: K-12 Dominates, Preschool Registers Fastest Growth

K-12 dominated the market and accounted for a significant revenue share in 2023, With the growing penetration of digital classrooms, adaptive learning apps, and government-initiated e-learning programs. All over the world schools are using AI-powered tutoring systems, gamification, and immersive learning tools to engage students better in their academic activities.

The Preschool segment is poised to grow at the fastest CAGR over the forecast period due to increased acceptance of digital education solutions for early childhood and growth in demand for mobile-based learning applications and AI-based storytelling tools that support cognitive development among young learners.

By Deployment: Cloud Leads, On-Premises Gains Traction

Cloud dominated the market and accounted for significant revenue share in 2023, thanks to its scalability, accessibility, and affordability. Even cloud-based EdTech solutions allow for remote learning, instantaneous collaboration, and analytics powered by AI.

On-Premises is expected to register the fastest CAGR during the forecast period, increasing adoption of the On-Premises segment is driven by institutes willing to ensure data is secured in a more controlled environment that would comply with regulatory standards.

By End Use: Business Segment Leads, Consumer Segment Grows Fastest

The Business segment dominated the market and accounted for a significant revenue share in 2023, Owing to its ability to effectively streamline the learning process between educational institutions and corporate training providers. However, enterprises are investing in digital platforms and the use of AI-driven learning analytics in training the workforce.

The Consumer is expected to be the fastest-growing segment owing to the considerable increase in number of individual registrations for online courses, mobile learning solutions, and on-demand skills development platforms.

Education Technology Market Segmentation:

By Sector

- Preschool
- K-12
- Higher Education
- Others

By End Use

- Business

- Consumer

By Type

- Hardware
- Software
- Content

By Deployment

- Cloud
- On-Premises

Key Regional Developments: North America Leads the Market, Asia-Pacific Registers Fastest Growth

North America dominated the market and accounted for 35% of revenue share, driven by the growing adoption of AI-based learning solutions, government funding programs toward digital education, and key EdTech companies in the region. It is perhaps due to inactive smart classroom investments and stable corporate training programs in the region.

The Asia-Pacific is projected to have the fastest growth rate driven by the growing need for online education, rising internet penetration, and assistance from the government-led digital learning initiatives in India and China. The increasing adoption of mobile-based learning platforms and AI-powered education applications will additionally boost the growth of the market in the region.

Recent Developments in Education Technology Market (2024)

- January 2024: Coursera announced the expansion of its AI-powered learning tools, enhancing its personalized course recommendations for learners worldwide.
- February 2024: Google for Education introduced AI-driven features to Google Classroom, improving assignment automation and student engagement tracking.
