The diabetic food market is estimated to grow at a CAGR of 6.04%, attaining US\$15.169 billion by 2030, from US\$11.314 billion in 2025.

NEW YORK, NY, UNITED STATES, February 28, 2025 /EINPresswire.com/ -- According to a new study published by Knowledge Sourcing Intelligence, the [Diabetic Food market](#) is projected to grow at a CAGR of 6.04% between 2025 and 2030 to reach US\$15.169 billion by 2030.

Diabetic food is a dietary product that aids in the maintenance and regulation of blood glucose levels. It also helps with weight maintenance. With an increase in diabetes incidence throughout the world, the demand for diabetic meals is likely to rise significantly. The increasing incidence of various forms of diabetes (type 1 and type 2) among the population is raising awareness of the necessity of eating nutritious diabetic foods to reduce the risk of developing future problems. Diabetes has become more prevalent in recent years, posing a significant burden on both younger and older generations.

The increasing number of diabetes cases worldwide is expected to propel the demand for diabetic foods during the forecasted timeline. The global cases of diabetes have increased massively, which can majorly be attributed to the increasing consumption of processed foods and beverage products and the prevalence of unhealthy lifestyles.

The British Diabetic Association, in its global report, stated that during the 2022-23 financial year, a total of 4.4 million individuals in the nation had diabetes, along with 1.2 million individuals living with type 2 diabetes. The agency stated that the total cases of diabetes in 2022-23

witnessed an increase of 167,822 cases compared to the 2021-22 financial year. In the nation, about 8% of the total individuals living with diabetes have type 1, whereas about 90% of diabetes patients suffer from type 2 diabetes.

Based on food type, the global diabetic food market is divided into [confectionary](#), ice creams and jellies, dietary beverages, snacks, baked products, dairy products, and others. These products are designed with considerations like low glycemic index, high fiber content, and reduced [sugar](#), often using alternative sweeteners. However, individuals with diabetes must consult healthcare professionals for personalized dietary plans.

The global diabetic food market is segmented according to distribution channels online and offline. Offline channels are usually supermarkets, hypermarkets, specialty stores, and pharmacies. Online channels include e-commerce sites, direct-to-consumer websites, and online stores.

Geography-wise, the Asia Pacific region is expected to grow significantly in the forecasted timeline. The increasing number of cases of diabetic food products in this region is expected to boost the growth of diabetic foods. Various countries in the region, like India, China, Japan, and Singapore, witnessed massive growth in diabetes cases. For instance, the World Health Organization, in its report, stated that in India, 77 million people over 18 years had type 2 diabetes. The agency stated that for individuals above 18 years, the prevalence of prediabetes was recorded at 25 million. Similarly, the cases of diabetes in other nations in the region, like China, Singapore, and Japan, also witnessed significant growth in the total diabetes cases in the past few years.
