Increase in demand for enhanced and seamless end-to-end customer experience and decline in operating cost due to adoption of CaaS have boosted the growth of the global contact center as a service (CaaS) market. However, concerns regarding security, possibility of fraud cases, and activity with the contact center as service hinder the market growth. On the contrary, surge in need for application programming interface-based contact centers would open new opportunities in the future.

Cloud-based software applications called Contact Center as a Service (CCaaS) are utilized by incoming and outgoing departments to deliver an improved client interaction overall while maintaining everything online instead of on premises infrastructure. Contact routing, sales force assistance, and engagement tracking are the main priorities of CCaaS.. Businesses may start a contact center without any hardware by using CCaaS software solutions. Every client touch point is streamlined into a single platform via a CCaaS solution. These exchanges can take place via text messaging, live chat, email, and phone conversations.
