

PointFire Localizer: An Open-Source GitHub Action for Localizing SharePoint Framework (SPFx) Solutions

PointFire Localizer automates SPFx localization in GitHub. Open-source & free—get it on GitHub: <https://github.com/marketplace/actions/pointfire-localizer>

OTTAWA, ONTARIO, CANADA, March 18, 2025 /EINPresswire.com/ -- PointFire Localizer is an [open-source GitHub Action](#) designed to streamline the localization of SharePoint Framework (SPFx) solutions using Azure AI Translator.

Originally developed for internal use, PointFire Localizer was created when no existing solution met the need for automated SPFx key translations. By open-sourcing it, we've made it easy for developers to automatically translate their SPFx solutions into multiple languages during the build process.

Key Features:

- Automated Localization: Easily translate SPFx keys into all supported locales.
- Powered by Azure AI Translator: Ensures high-quality, context-aware translations.
- Seamless GitHub Integration: Runs automatically as part of your CI/CD pipeline.

Developed by Microsoft MVP Elio Struyf, who is also Lead Engineer at PointFire, this tool is available for free on GitHub Marketplace:

□ Get PointFire Localizer on GitHub □ <https://github.com/marketplace/actions/pointfire-localizer>

For a detailed guide on how to integrate it into your projects, check out our blog post:

□ Localize your SPFx Solutions with PointFire Localizer □
